1. ESTABLISH A PLAN

KNOW YOUR DEBTORS

There's only so far you can go to carry debt on the job. You can't keep doing it forever. So, determine what you can afford to pay each month and stick to it. If you keep paying off your credit cards, you'll have more money to put toward your college education. You can also consider other options.

FIND A FINANCIAL SAFETY NET

World Yearbook of Education 2014

Tara Fenwick, Eric Mangez, Jenny Ozga, 2014-01-10

This latest volume in the World Yearbook of Education Series focuses on a major and highly significant development in the governing of education across the globe: the use of knowledge based technologies as key policy sources. A combination of factors has produced this shift: first, the massive expansion of technological capacity signalled by the arrival of big data that allows for the collection, circulation and processing of extensive system knowledge. The rise of data has been observed and discussed extensively, but its role in governing and the rise of comparison as a basis for action is now a determining practice in the field of education. Comparison provides the justification for modernising policy in education both in the developed and developing world, as national policy makers selectively seek templates of success from the high performers and demand solutions to apparent underperformance through the adoption of the policies favoured by the likes of Singapore, Finland and Korea. In parallel, the growth of particular forms of expertise, the rise and rise of educational consultancy, the growth of private for profit involvement in provision of educational goods and services, and the increasing consolidation of networks of influence in the promotion of best practice are affecting policy decisions. Through these developments, the nature of knowledge is altered along with the relationship between knowledge and politics. Knowledge in this context is co-constructed; it is not disciplinary knowledge but knowledge that emerges in the sharing of experience. This book provides a global snapshot of a changing educational world by giving detailed examples of a fundamental shift in the governing and practice of education learning by assessing approaches to the changing nature of comparative knowledge and information. Tracking the translation and mobilisation of these knowledges in the governing of education learning. Identification of the key experts and knowledge producers, circulators, translators and analysis of how best to understand their influence. Mapping of the global production of these knowledges in terms of their range and reach, the interrelationships of actors and their effects in different national settings. Drawing on material from around the world, the book brings together scholars from different backgrounds who provide a tapestry of examples of the global production and national reception and mediation of these knowledges and who show how change enters different national spaces and consider their effects in different national settings.

A Problem of Fit

Phillip B. Levine, 2022-04-22

A critical examination of the complex system of college pricing: how it works, how it fails, and how fixing it can help both students and universities. How much does it cost to attend college in the United States today? The answer is more complex than many realize. College websites advertise a sticker price, but uncovering the actual price, the one after incorporating

financial aid can be difficult for students and families This inherent uncertainty leads some students to forgo applying to colleges that would be the best fit for them or even not attend college at all The result is that millions of promising young people may lose out on one of society's greatest opportunities for social mobility Colleges suffer too losing prospective students and seeing lower enrollments and less socioeconomic diversity If markets require prices to function well then the American higher education system rife as it is with ambiguity in its pricing amounts to a market failure In *A Problem of Fit* economist Phillip B Levine explains why institutions charge the prices they do and discusses the role of financial aid systems in facilitating and discouraging access to college Affordability issues are real but price transparency is also part of the problem As Levine makes clear our conversations around affordability and free tuition miss a larger truth that the opacity of our current college financing systems is a primary driver of inequities in education and society In a clear-eyed assessment of educational access and aid in a post COVID-19 economy *A Problem of Fit* offers a trenchant new argument for educational reforms that are well within reach
