Dystopian States of America Matthew B. Hill, 2022-09-13 Dystopian States of America is a crucial resource that studies the impact of dystopian works on American society including ways in which they reflect our deep and persistent fears about environmental calamities authoritarian governments invasive technologies and human weakness Dystopian States of America provides students and researchers with an illuminating resource for understanding the impact and relevance of dystopian and apocalyptic works in contemporary American culture Through its wide survey of dystopian works in numerous forms and genres the book encourages readers to connect with these works of fiction and understand how the catastrophically grim or disquieting worlds they portray offer insights into our own current situation In addition to providing more than 150 encyclopedia articles on a large and representative sample of dystopian apocalyptic narratives in fiction film television and video games including popular works that often escape critical inquiry Dystopian States of America features a suite of critical essays on five themes war pandemics totalitarianism environmental calamity and technological overreach that serve as the foundation for most dystopian worlds of the imagination These offerings complement one another enabling readers to explore dystopian conceptions of America and the world from multiple perspectives and vantage points

Artificial Intelligence 'Arms Dynamics': The Case Of The U.S. And China Rivalry Gloria Shkurti Özdemir, Artificial Intelligence AI has undergone rapid evolution not only by penetrating every aspect of our life but also by transitioning from theoretical concepts to foundational components of modern military strategy This book focuses into the heart of this evolution focusing on the escalating AI arms rivalry between the U S and China Drawing upon Barry Buzan s theoretical frameworks this book aims to analyze if there is an AI arms race between the U S and China as a part of the ongoing great power competition Findings from the study indicate that both countries perceive AI as a pivotal element of future warfare and national security leading to significant investments in research and development The U S with its historically dominant military technological edge seeks to maintain its superiority through innovation and strategic partnerships Conversely China s ambitious AI strategy aims to establish its leadership in AI technology by 2030 challenging

U S dominance and reshaping the global security landscape The analysis reveals that rather than an AI arms race where the possibility for warfare should be high the rivalry between U S China is more an AI arms competition with both states not willing to start a direct war with each other at least for the short term Furthermore the study finds out that the AI arms competition between both states is driven by both external threats and internal motivations however the technological imperative which is considered as an independent variable is the main driving force behind this rivalry In conclusion the research suggests that the AI arms competition between the U S and China is a defining feature of contemporary international security dynamics with profound implications for global stability *The Corporate Alibi* Amy Elizabeth

Stambach,2025-07 In her pathbreaking book Amy Elizabeth Stambach investigates American investors incursions into Africa as seen by affected people on the ground Stambach synthesizes a cluster of US assisted industries across the continent focusing on water resource management real estate procurement agricultural businesses health care and private education Drawing on more than thirty years of research conducted in southern and eastern Africa *The Corporate Alibi* examines how corporate globalization has been based on legal yet environmentally and socially devastating practices that divert scrutiny from the harm investors cause to the environment democracy and people More than just a critique of corporate globalization this book serves as a beacon of hope illuminating how communities can and do work around against and sometimes with investors to advance shared interests and ideals Stambach suggests ways to operate within national and global governance structures to bring about a more politically and economically equitable future *Proceedings of the 5th Brazilian*
