Taxation of Human Capital and Wage Inequality Fatih Guvenen, 2010-10 Wage inequality has been significantly higher in the U.S. than in continental European countries since the 1970s. This report studies the role of labor income tax policies (LITP) for understanding these facts. Countries with more progressive LITP have significantly lower before-tax wage inequality at different points in time. Progressivity is also negatively correlated with the rise in wage inequality during this period. Wage inequality arises from differences across individuals in their ability to learn new skills as well as from idiosyncratic shocks. Progressive taxation compresses the after-tax wage structure, thereby distorting the incentives to accumulate human capital, in turn reducing the cross-sectional dispersion of before-tax wages. Noon The Rise to Power , Ungleichheit Anthony B. Atkinson, 2016-08-13 Soziale Ungleichheit ist das Grundproblem unserer Zeit. Zwischen Superreich und Bettelarm klafft heute weltweit ein Abgrund, der tiefer und breiter ist, denn je. Was sollten wir tun? Seine Antwort darauf bringt Atkinson in einem epochenmachenden Meisterwerk auf den Punkt: Ein Prozent der Weltbevölkerung besitzt über 50 Prozent des Weltvermögens. Tendenz steigend. 99

Prozent der Weltbevölkerung diskutieren und verzweifeln handeln aber nicht Soziale Ungleichheit ist für Anthony Atkinson den weltweit führenden Experten ganz oben auf der Agenda der Weltprobleme Man kann fast alle tagespolitischen Konflikte die Flüchtlings und Eurokrise den Terrorismus und die Kriege im Nahen Osten auf sie zurückführen Gegen die lähmende Untätigkeit legt der britische Ökonom ein Programm für den Wandel vor und empfiehlt 15 konkrete Maßnahmen für die Bereiche Technologie Arbeit soziale Sicherheit sowie Kapital und Steuern Ein Meisterwerk das Analyse Aufklärung Appell und Handlungsanleitung miteinander verwebt Justice, Equality and Tax Law Nevla Čičin-Šain, Mario Riedl, 2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled Justice Equality and Tax Law contains not only a selection of the best master's theses of the full time LL.M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic

Amaglobeli, Mr. Valerio Crispolti, Ms. Era Dabla-Norris, Pooja Karnane, Florian Misch, 2018-05-11 This paper describes a new comprehensive database of tax policy measures in 23 advanced and emerging market economies over the last four decades. We extract this information from more than 900 OECD Economic Surveys and 37 000 tax related news from the International Bureau of Fiscal Documentation using text mining techniques. The innovation of this dataset lies in its granularity: changes in the rates and bases of personal and corporate income taxes, value added and sale taxes, social security contributions, excise and property taxes are systematically documented. In addition, the database provides information on the announcement and implementation dates, whether the measures represent major changes, are part of a broader tax package and phased in over several years. The paper also presents a range of stylized facts suggesting that information from this database is useful to deepen the analysis of tax policy changes for research and policy purposes.
