Meyer,John F. Hogan,2010-10-12 Urbanization and growing wealth in developing countries portend a large increase of demand for modern energy services in residential commercial and public service buildings in the coming decades Pursuing energy efficiency in buildings is vital to energy security in developing countries and is identified by the Intergovernment Panel on Climate Change as having the greatest potential for cost effective reduction of CO2 emissions by 2030 among all energy consuming sectors Building energy efficiency codes BEECs along with energy efficiency standards for major appliances and equipment are broadly recognized as a necessary government intervention to overcome persistent market barriers to capturing the economic potential of energy efficiency gains in the residential commercial and public service sectors Implementation of BEECs help prevent costly energy wastes over the lifecycles of buildings in space heating air conditioning lighting and other energy service requirements Nonetheless achieving the full potential of energy savings afforded by more energy efficient buildings requires holding people who live or work in buildings accountable for the cost of energy services Compliance enforcement has been the biggest challenge to implementing BEECs This report summarizes the findings of an extensive literature survey of the experiences of implementing BEECs in developed countries as well as those from case studies of China Egypt India and Mexico It also serves as a primer on the basic features and contents of BEECs and the commonly adopted compliance and enforcement approaches This report highlights the key challenges to improving compliance enforcement in developing countries including government commitment to energy efficiency the effectiveness of government oversight of the construction sector the compliance capacity of building supply chain and financing constraints The report notes that the process of transforming a country s building supply chain toward delivering increasingly more energy efficient buildings takes time and requires persistent government intervention through uniformly enforced and regularly updated BEECs The report recommends increased international support in strengthening the enforcement infrastructure for BEECs in middle income developing countries For low and lower middle income countries there is an urgent need to assist in improving the effectiveness of government oversight system for building construction laying the foundation for the system to also cover BEECs *Logistic Codes & Terms* United States. Anglican Chant and Chanting in England, Scotland, and America, 1660 to 1820 Ruth Mack Wilson,1996 This book presents for the first time a history of English liturgical chant as performed in the Church of England and its transmission to churches in Scotland and the United States In the mid sixteenth century Reformation the complex ritual of the latin rite was replaced by a one volume Book of Common Prayer in English The general nature of the new rubrics especially for music left many of the details of performance to be worked out in traditional ways Thus the music evolved from its Latin roots in oral and later written practice The body of music that makes up the chanting practice of Anglican and related churches around the world is indeed diversified Some texts of the liturgy are harmonized in four or more voice parts often with organ accompaniment and others are sung in plainsong The largest group of chants those for the psalms and canticles has an idiosyncratic written form and a performance practice that continues to evolve in oral tradition This music is commonly known as Anglican chant Its origins in the seventeenth century and its codification in the eighteenth are explored in the choral establishments of the Church of England and parish churches in England Scotland and the United States

metropolitan areas sharing common economic landscape social and cultural characteristics The rise of megapolitan areas will change how America plans For instance in an area comparable in size to France and the low countries of the Netherlands and Belgium considered among the world s most densely settled America s megapolitan areas are already home to more than two and a half times as many people Indeed with only eighteen percent of the contiguous forty eight states land base America s megapolitan areas are more densely settled than Europe as a whole or the United Kingdom Megapolitan America goes into spectacular demographic economic and social detail in mapping the dramatic and surprisingly optimistic shifts ahead It will be required reading for those interested in America s future
