New Food Product Development Holger York Toschka, 2025-03-31. With a new subtitle to reflect its global perspective and a new author, this book continues the mission of earlier editions to describe the stages of food development in detail, beginning with sources of ideas and moving through development, final screening and introduction into the marketplace. Every chapter contains one or more case studies. New chapters address the tools available for the food industry and manufacturers to select, sharpen, fine tune and support new food product launches. More attention is given to the influence of global concerns about the deteriorating environment and here particularly the role and responsibility of the food industry and those working on new food products.

Key Features: This edition adds the perspective from single product or product range development to the overall portfolio management. This edition explains strategies for successful management of unpredictable, uncertain and complex conditions in new food product development. NFPD Chapters contain one or more case studies to add pedagogy for students and practical applications for professionals. More focus is given to the role and responsibilities of research and development (R D) in innovation management. Two chapters are used to predict the future direction for NFPD. This book can serve as the core textbook for the capstone new food product development course typically found in the food science curriculum and is of equal value to early career food scientists finding themselves in a multidisciplinary team working on the creation of a new food product.

Beyond Advertising Myths Pranjal Jain, 2025-10-03. Build ads that think, act and grow like your business. Most founders think advertising is about budgets, tools or agencies. It is not. It is about leadership. Too many ambitious founders waste money treating ads like a side task. They outsource decisions, copy competitors or bet on one campaign to save them. When it fails, they are left dependent and have no clarity on what truly drives growth. *Beyond Advertising Myths* shows you exactly how to lead advertising the founder way. Through raw stories, real founder examples and clear frameworks, it reveals why gut instincts fail, why agencies cannot replace your leadership and why even winning campaigns fade. More importantly, it teaches you how to lead with clarity, make every ad count and fast track your business toward scalable growth.
