ordered and delivered online via an online grocery shop Integration with intelligent storage cupboards and an interface to intelligent kitchen stoves are also planned Since go to market comes with the introduction of a new business model marketing has to deal with pricing strategy for the time being The machine is rented for a comparatively low monthly fee However the customer pays additional fees for using the online services sharing recipes networking with refrigerators etc A new price model is also to be used for this which contains both a variant based on the benefit intensity and a flat rate variant However the management is now faced with the question of whether this food processor and the associated business model have any chance on the market at all In addition to other issues the management is particularly interested in how high the individual willingness to pay of customers will be in relation to the use of online services History Computer Review ,2001
