Artificial Intelligence in Society Michael Heintz, Norbert Huchler, 2024-12-27 Artificial Intelligence AI represents a key technology for social change in the 21st century Numerous technological applications are now in use that are based on machine learning and the associated possibilities for data collection use and exploitation By making large amounts of data manageable and hidden patterns and connections visible AI makes many things faster easier and more efficient be it in everyday life at work or in organizations However the question remains open as to what profound and sometimes latent consequences for humans as social beings and

social coexistence are associated with the use and development of AI How is the relationship between people and technology changing through AI and how should this change be assessed What opportunities and risks do the use and development of AI open up for people and society What are the limits of change and what design options are available And last but not least What and who determines the development paths that AI takes with what consequences and for whom Some of the articles in this volume have been automatically translated into English by Springer machine translation by the service DeepL com The contributions were then thoroughly revised corrected and supplemented by the authors The authors are therefore responsible not only for the content but also for the linguistic form of the articles Nevertheless the text of the book may differ stylistically from a conventional translation

Rathore on Real Estate Valuation Dr. Shailendra Singh Rathore, 2025-07-19 This is author's third book in a row on valuation As the market evolves so too must our methodologies algorithms and understandings This

third volume of author's exploration into real estate valuation is both a continuation and a deepening of the journey embarked on in the first book in the year 2001. The landscape of real estate valuation is ever changing, shaped and reshaped by the evolving laws of the land, technological advancements and shifting societal needs. Yet amidst this flux, the fundamental principles of valuation remain steadfast, guiding investors, developers and analysts through the complexities of property assessment. Loaded with 75 infographs, this book differs in many ways from author's previous books. Its scope has been solely restricted to the valuation of land and buildings. The writing style adopted will make the narrative feel as though you are immersed in a work of fiction. It addresses the quantitative metrics that form the backbone of our evaluations and the qualitative factors that influence market dynamics and property value. From the nuances of sustainable building practices to the impact of global economic shifts, the spectrum of factors has been explored that bear upon the true value of real estate.

Management Projects Keith Ward, 2003 A review of a range of natural resources projects prepared during the 1990s by the Asian Development Bank. ADB suggests that existing practices of economic analysis tend to capture only some of the impacts that such projects typically have. Historically, project analysis at ADB and elsewhere has tended to concentrate on identifying a monetized benefit in excess of 12 percent economic internal rate of return (EIRR) from direct resource use impacts and simply identifying and describing nonquantifiable impacts. With the adoption of the ADB Environment Policy and the growing recognition that it is very often the poorest who suffer most from natural resource depletion and degradation, a case is made that more analytic rigor in capturing as many as possible of the resource impacts of such projects is desirable. This report

therefore suggests some specific techniques to strengthen the economic analysis of natural resources projects including improving the application of the benefits transfer method defining the spatial boundaries of project economic analysis establishing an appropriate accounting stance for the project establishing the project's counterfactual i.e. without project situation and including the health impacts of such projects The use of appropriate discount rates for sensitivity analysis and for investment decision making are discussed and guidance is given on presenting the results of a project analysis and summarizing the poverty reduction impact of natural resource management projects
