Rethinking Identities Across Boundaries Claudia Capancioni, Mariaconcetta Costantini, Mara Mattoscio, 2023-11-22 This collection of essays aims to widen the current critique on borders by examining their entanglements with constructions of identity and disciplinary categories In particular it calls into question established models of gender notions of narrative genres and typological genera of borders in today's literary artistic philosophical and socio political discourse The chapters interrogate

boundaries and boundary crossing not only in terms of geographical frontiers and the physical acts of trespassing but also as discursive constructs that police crossing subjects as gendered subjects on the one hand and identify artistic genres and academic disciplines as fixed sealed in ways of understanding the world on the other Taking inspiration from the multiple meanings of the Italian word *genere* which stands for gender genre and typology genus simultaneously the volume reflects on the gendered narrative and typological nature of borders and border imagery and on the significance and potentialities of crossover phenomena taking place in borderlands in the fields of arts literature anthropology sociology and philosophy

Deepfakes

Graham Meikle, 2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone s face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the

public and the personal converge and in which all human experience becomes data to be shared. Timely, clear, and accessibly written, this is an essential text for students and scholars of media communication, cultural studies, and sociology, as well as general readers.

Generative AI in Creative Industries Amina Al-Marzouqi, Said Salloum, Khaled Shaalan, Tarek Gaber, Ra'ed Masa'deh, 2025-07-04

This book compiles a comprehensive collection of pioneering research that addresses the multifaceted challenges and theoretical aspects of Generative AI in creative industries. Generative AI, a groundbreaking technological development, has been carving a significant niche within the creative industries. This innovative form of AI, exemplified by models like OpenAI's ChatGPT, is not only transforming the landscape of human-like text generation but is also radically reshaping creative fields such as music, literature, and visual arts. In the realm of creative industries, Generative AI serves as a catalyst for artistic innovation, offering tools for artists to push the boundaries of creativity. It assists in composing music, generating unique artworks, and even writing stories or scripts, thereby democratizing the creative process. The integration of Generative AI in these industries promises a synergy between human creativity and machine intelligence, potentially leading to novel genres and forms of art. Despite its transformative potential, the incorporation of Generative AI in creative fields is not devoid of challenges. Ethical considerations such as authorship, rights, originality, and the impact on traditional creative roles are pivotal. Moreover, the authenticity and emotional depth of AI-generated content compared to human-created art is a subject of ongoing debate. The book aims to feature original manuscripts encompassing a wide array of topics, from the development of new generative technologies and their practical application in creative fields to critical analysis of the ethical, legal, and cultural implications of these systems. By gathering the latest advancements in this field and spotlighting emerging avenues for research, this book serves as an

invaluable resource and guide for researchers artists and practitioners operating at the intersection of Generative AI and creative industries
