Max Streaming Compare Tutorial:

Services Marketing: People, Technology, Strategy (Ninth Edition) Jochen Wirtz, Christopher Lovelock, 2021-10-15
Services Marketing People Technology Strategy is the ninth edition of the globally leading textbook for Services Marketing by Jochen Wirtz and Christopher Lovelock extensively updated to feature the latest academic research industry trends and technology social media and case examples This book takes on a strong managerial approach presented through a coherent and progressive pedagogical framework rooted in solid academic research It features cases and examples from all over the world and is suitable for students who want to gain a wider managerial view

Information Technology - New Generations Shahram Latifi, 2017-07-15 This volume presents a collection of peer reviewed scientific articles from the 14th International Conference on Information Technology New Generations held at the University of Nevada at Las Vegas on April 10 12 at Tuscany Suites Hotel in Las Vegas The Book of Chapters addresses critical areas of information technology including web technology communications computing architectures software engineering security and data mining

The Art of Wireless Sensor Networks Habib M. Ammari, 2013-12-17 During the last one and a half decades wireless sensor networks have witnessed significant growth and tremendous development in both academia and industry A large number of researchers including computer scientists and engineers have been interested in solving challenging problems that span all the layers of the protocol stack of sensor networking systems Several venues such as journals conferences and workshops have been launched to cover innovative research and practice in this promising and rapidly advancing field Because of these trends I thought it would be beneficial to provide our sensor networks community with a comprehensive reference on as much of the findings as possible on a variety of topics in wireless sensor networks As this area of research is in continuous progress it does not seem to be a reasonable solution to keep delaying the publication of such reference any more This book relates to the second volume and focuses on the advanced topics and applications of wireless sensor networks Our rationale is that the second volume has all application specific and non conventional sensor networks emerging techniques and advanced topics that are not as matured as what is covered in the first volume Thus the second volume deals with three dimensional underground underwater body mounted and societal networks Following Donald E Knuth's above quoted elegant strategy to focus on several important fields The Art of Computer Programming Fundamental Algorithms 1997 all the book chapters in this volume include up to date research work spanning various topics such as stochastic modeling barrier and spatiotemporal coverage tracking estimation counting coverage and localization in three dimensional sensor networks topology control and routing in three dimensional sensor networks underground and underwater sensor networks multimedia and body sensor networks and social sensing Most of these major topics can be covered in an advanced course on wireless sensor networks This book will be an excellent source of information for graduate students majoring in computer science computer engineering electrical engineering or any related discipline Furthermore computer scientists researchers and

practitioners in both academia and industry will find this book useful and interesting
