**Handbook of Splines** Gheorghe Micula, Sanda Micula, 2012-12-06 The purpose of this book is to give a comprehensive introduction to the theory of spline functions together with some applications to various fields emphasizing the significance of the relationship between the general theory and its applications At the same time the goal of the book is also to provide new material on spline function theory as well as a fresh look at old results being written for people interested in research as well as for those who are interested in applications The theory of spline functions and their applications is a relatively recent field of applied mathematics In the last 50 years spline function theory has undergone a wonderful development with many new directions appearing during this time This book has its origins in the wish to adequately describe this development from the notion of spline introduced by I. J. Schoenberg 1901 1990 in 1946 to the newest recent theories of spline wavelets or spline fractals Isolated facts about the functions now called splines can be found in the papers of L. Euler A. Lebesgue G. Birkhoff J. *Spline Functions* Larry L. Schumaker, 2015-08-13 This book describes in detail the key algorithms needed for computing with spline functions and illustrates their use in solving several basic problems in numerical analysis including function approximation numerical quadrature data fitting and the numerical solution of PDEs The focus is on computational methods for bivariate splines on triangulations in the plane and on the sphere although both univariate and tensor product splines are also discussed The book contains numerous examples and figures to illustrate the methods and their performance All of the algorithms in the book have been coded in a separate MATLAB package available for license The package can be used to run all of the examples in the book and also provides readers with the essential tools needed to create software for their own applications In addition to the included bibliography a list of over 100 pages of additional references can be found on the book's website

Schernthanner,2017-04-03 Harald Schernthanner verfolgt das Ziel aus geoinformatischer Sicht eine konzeptionelle Grundlage zur räumlichen Optimierung von Immobilienportalen zu schaffen Dabei geht der Autor davon aus dass Verfahren der räumlichen Statistik und des maschinellen Lernens zur Mietpreisschätzung sich besser als die bisher eingesetzten Verfahren der hedonischen Regression zur räumlichen Optimierung von Immobilienportalen eignen Er zeigt dass die von Immobilienportalen publizierten webbasierten Mietpreiskarten nicht die tatsächlichen räumlichen Verhältnisse auf Immobilienmärkten wiedergeben Alternative webbasierte Darstellungsformen wie beispielsweise Gridmaps sind dem Status quo der Immobilienpreiskarten von Immobilienportalen überlegen und visualisieren die tatsächlichen räumlichen Verhältnisse von Immobilienpreisen zweckmäßiger

*Splines And Compartment Models: An Introduction* Karl-ernst Erich Biebler,Michael Wodny,2013-07-23 This book presents methods of mathematical modeling from two points of view Splines provide a general approach while compartment models serve as examples for context related to modeling The preconditions and characteristics of the developed mathematical models as well as the conditions surrounding data collection and model fit are taken into account The substantial statements of this book are mathematically proven The results are ready for application with examples and related program codes given In this book splines are algebraically developed such that the reader or user can easily understand and vary the numerical construction of the different kinds of spline functions The classical compartment models of the pharmacokinetics are systematically analyzed and connected with lifetime distributions As such parameter estimation and model fit can be treated statistically with a varied minimum chi square method This method is applicable for single kinetics and also allows the calculation of average kinetics
