Ball, 2018-10-17 Updated Edition of a Best Seller Offering a rich introduction to how scholars analyze crime Criminological Theory Context and Consequences moves readers beyond a commonsense knowledge of crime to a deeper understanding of the importance of theory in shaping crime control policies The Seventh Edition of the authors clear accessible and thoroughly revised text covers traditional and contemporary theory within a larger sociological and historical context It includes new sources that assess the empirical status of the major theories as well as updated coverage of crime control policies and their connection to criminological theory *Good Democratic Leadership* John Kane, Haig Patapan, 2014-07-17 Good Democratic Leadership On Prudence and Judgment in Modern Democracies explores whether in the current atmosphere of international economic and political tension and more generally democracies foster and support effective political judgment and good leadership In one sense with their ideals of transparent government and extensive deliberation democracies might appear to promote such good leadership and sound decision making Yet in another sense democratic leaders continue to face a number of challenges including the sometimes cumbersome institutional limits placed on their discretion the need for balance between national interest popular sentiment and universal values as well as the problem of disproportionate influence of commercial interests in the management of the economy In analysing various aspects of democratic leadership judgement and decision making from a variety of theoretical and practical perspectives all the contributors to this book address this question of the extent to which democracies support good judgment and thereby the possibility of good leadership in democracies All Data Are Local Yanni Alexander Loukissas, 2019-04-30 How to analyze data settings rather than data sets acknowledging the meaning making power of the local In our data driven society it is too easy to assume the transparency of data Instead Yanni Loukissas argues in All Data Are Local we should approach data sets with an awareness that data are created by humans and their dutiful machines at a time in a place with the instruments at hand for audiences that are conditioned to receive them The term data set implies something discrete complete and portable but it is none of those things Examining a series of data sources important for understanding the state of public life in the United States Harvard s Arnold Arboretum the Digital Public Library of America UCLA s Television News Archive and the real estate marketplace Zillow Loukissas shows us how to analyze data settings rather than data sets Loukissas sets out six principles all data are local data have complex attachments to place data are collected from heterogeneous sources data and algorithms are inextricably entangled interfaces recontextualize data and data are indexes to local knowledge He then provides a set of practical guidelines to follow To make his argument Loukissas employs a combination of qualitative research on data cultures and exploratory data visualizations Rebutting the myth of digital universalism Loukissas reminds us of the meaning making power of the local *A Cultural History of Money in the Modern Age* Taylor C. Nelms, David Pedersen, 2021-03-11 Bracketed by global financial crises and economic downturns the modern

age has been defined by debates about and transformations of money The period witnessed the consolidation of national currencies and monetary policies as well as the diversification of payment technologies and the proliferation of financial instruments Throughout even as it appeared abstracted by finance and depoliticized by expert ideologies money was revealed again and again to be a powerful medium of cultural imagination and practical inventiveness as well as the site of public and political struggles Modern money both as a form of liquidity and as a claim on wealth remains deeply unsettled caught between private and public interests and subject to epic struggles over the infrastructures of value creation and circulation and their distributional consequences Drawing upon a wealth of visual and textual sources *A Cultural History of Money in the Modern Age* presents essays that examine key cultural case studies of the period on the themes of technologies ideas ritual and religion the everyday art and representation interpretation and the issues of the age

Global Slump David McNally, 2010-12-09 Global Slump analyzes the global financial meltdown as the first systemic crisis of the neoliberal stage of capitalism It argues that far from having ended the crisis has ushered in a whole period of worldwide economic and political turbulence In developing an account of the crisis as rooted in fundamental features of capitalism Global Slump challenges the view that its source lies in financial deregulation The book locates the recent meltdown in the intense economic restructuring that marked the recessions of the mid 1970s and early 1980s Through this lens it highlights the emergence of new patterns of world inequality and new centers of accumulation particularly in East Asia and the profound economic instabilities these produced Global Slump offers an original account of the financialization of the world economy during this period and explores the intricate connections between international financial markets and new forms of debt and dispossession particularly in the Global South Analyzing the massive intervention of the world s central banks to stave off another Great Depression Global Slump shows that while averting a complete meltdown this intervention also laid the basis for recurring crises for poor and working class people job loss increased poverty and inequality and deep cuts to social programs The book takes a global view of these processes exposing the damage inflicted on countries in the Global South as well as the intensification of racism and attacks on migrant workers At the same time Global Slump also traces new patterns of social and political resistance from housing activism and education struggles to mass strikes and protests in Martinique Guadeloupe France and Puerto Rico as indicators of the potential for building anti

capitalist opposition to the damage that neoliberal capitalism is inflicting on the lives of millions
