

ROBUST EQUITY PORTFOLIO MANAGEMENT

Robust Equity Portfolio Management is a systematic approach to investing in equity securities. It involves the selection of a portfolio of stocks that are expected to perform well over the long term, based on a set of criteria that are designed to minimize risk and maximize return. This approach is based on the principle of diversification, which is the idea that by investing in a variety of different stocks, an investor can reduce the risk of loss and increase the potential for gain.
