Venmo Update:

Social Media Cultures Dhiraj Murthy, 2024-12-15 In *Social Media Cultures* Dhiraj Murthy provides a theoretically grounded historical exploration of the social media landscape. Uniquely tracing the evolution of social media from traditional media like letters, postcards, and the telephone to new media and platforms, Murthy argues that these contemporary phenomena are not divorced from their analog antecedents. The historical and theoretical frameworks employed in this book allow readers to better understand the intricacies of nuanced modern dynamics like cancel culture, self-expression, and celebrity influence. Focusing on mobility, political discourse, and the power of witnessing from global perspectives, Murthy uses empirical case studies from both the Global South and North to demonstrate the profound impact of social media on culture, politics, and everyday life. Ultimately, Murthy encourages readers to reflect on their roles within the broader social media ecosystem and to consider the far-reaching consequences of social media engagement on a global scale. Scholars of communication, media studies, social media, and sociology will find this book of particular interest.

The Metaverse Matthew Ball, 2024-07-23 From the leading theorist of the Metaverse comes the eagerly anticipated revised and updated account of the next internet: what the Metaverse is, what it will take to build it, and what it means for all of us. A Hudson Booksellers Amazon Guardian Financial Times Economist and ByteDance Toutiao Best Book of the Year. In this substantially revised and updated edition of his internationally best-selling book, pioneering theorist and entrepreneur Matthew Ball goes beyond the hype cycle to present a definitive account of the future of the internet. The Metaverse, according to Ball's industry-shaping definition, is a persistent and interconnected network of 3D virtual worlds that will eventually serve as the gateway to most online experiences and underpin much of the physical world. As Ball recounts, the Metaverse is a thirty-year-old term, and the core ideas and technologies behind it have been in development for nearly a century. Only recently, however, did this fantastical concept begin to leap from the pages of science fiction and the depths of national research labs to the forefront of consumer technology, industrial engineering, healthcare, education, dating, and more. From the history of video games and virtual reality to proto-metaverses such as Second Life, Fortnite, and Roblox, to Generative AI and the groundbreaking films and television series of the Walt Disney Company, Ball points out that the Metaverse is already emerging around us and doesn't require a headset. Still, there are many breakthroughs required to fully realize the Metaverse, and he describes each in approachable but expert detail. Ball also lays out how governmental policy, the philosophy of Big Tech leaders, artificial general intelligence, economics, and human rights will shape the development of the Metaverse. Famous for his ability to bring clarity to complex and misunderstood topics, Ball demonstrates that the race to build the Metaverse, also known as the spatial or immersive internet, is only accelerating. The Metaverse will endure as an indispensable guide for enthusiasts, tech aficionados, and anyone curious about the profound transformations underway in our increasingly interconnected world.

advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues
