Lee, Bernhard Steffen, 2025-10-27

This unique open access volume represents an interdisciplinary dialog with top class researchers and practitioners on the Artificial Intelligence revolution. The contributions derive from structured interviews with community leaders who examine recent developments in AI and offer predictions about its impact on science, technology, business and society. The interviewees, leading thinkers and practitioners from fields such as Computer Science, Software Engineering, Philosophy, Psychology and Law, gathered at the multidisciplinary event AISoLA where they discussed developments in AI technologies, tools and research, and these exchanges were shaped into this coherent survey. In the debates surrounding the rapid advancement of AI, it's clear that while there is much sharing of ideas, in fact, true cooperation and alignment is rare; most fields still operate in silos. Given the pervasive nature of AI, it's critical that we move forward carefully to ensure that our decisions and progress are well considered. This book serves as a call to action, reminding us of our collective responsibility to shape the future. The authors offer points of agreement and contrast; the reader will better understand how we may still maintain control over technological progress in AI and its societal impact.

Ökorrassismus

Ciani-Sophia Hoeder, 2025-09-16. Wer zahlt den wahren Preis für unsere Umweltkrise? Ciani-Sophia Hoeder beleuchtet die Verflechtungen zwischen ökologischer Ungerechtigkeit und Rassismus. Ob eine Person neben einer Milderdeponie oder im Grünen lebt, indigene Gemeinschaften zugunsten des westlichen Konsums enteignet oder durch Green Gentrification ganze Personengruppen verdrängt werden, all das ist kein Zufall. Dahinter steckt Ökorrassismus. Auch die fortschreitende Erderwärmung trifft systematisch People of Color, während der weiße Westen von einem Lebensstil profitiert, der die Welt an den Abgrund bringt.
