Widdershoven,2025-10-01 Today health insurance is a key component in the system of social security in most European Union countries In many of these countries modern health insurance funds and healthcare insurers play an essential role in implementing the public health insurance system Many of these health insurance funds have a long and fascinating history of which clear traces can be seen today in the organisation and structure of health insurance as well as health insurance funds and insurers In Two centuries of solidarity the authors compare the systems of health insurance health insurance funds and healthcare insurers in Germany Belgium and the Netherlands Given the similar political economic and social development that these countries have undergone in the past 60 years and the availability of a qualitatively high level of health care one might expect a high degree of similarity between these countries healthcare insurance systems However the dissimilarities are surprising In fact these differences are currently becoming ever more apparent between systems in general and the structure and operation of the health insurance funds and health care insurers in particular The differences include the compulsory nature of insurance the extent of coverage premiums entrepreneurship competition and the degree of private insurance Many of these national singularities can be understood and explained only by considering the historical background of the health insurance systems the insurers and their evolution over the past two centuries This study adopts an institutional and political perspective towards a further understanding of the development of health insurance and of how this ultimately determined the specific nature of the healthcare insurers and funds and the way they currently operate in Germany Belgium and the Netherlands **Geraubt!** Gerard Aalders,2000 **International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences** ,1996

Nazi Looting Gerard Aalders,2004 The Nazi looting machine was notoriously efficient during the Second World War In the Netherlands 8.5 million citizens suffered losses estimated at 3.6 billion guilders Approximately one third of these losses were borne by Jews who comprised only 1.6% of the total population In today's terms the German occupiers stripped the Jewish population of assets worth 7 billion Nazi Looting offers a comprehensive history of the Dutch experience and demonstrates how reputable indigenous institutions acted as willing collaborators Beginning with a survey of international law and various definitions of looting the author shows how the Germans systematically robbed Dutch Jewry through a variety of means that gave the outward appearance of honest trading Forced to sell under duress and at unreasonably low prices few dared refuse the German on the doorstep when threatened with prison or incarceration in a camp The plundering was total and systematic In May 1940 a team of highly trained art historians linguists musicologists and literary experts arrived immediately behind the victorious German troops to catalogue the vast collections for Hitler From 1941 Jews were compelled to deposit all their money into a bank called Lippmann Rosenthal Co The name of the bank itself was a cynical ploy since it was taken from a respected Jewish owned Amsterdam bank and presented as a new branch This bank however simply

channelled money into the Third Reich with the help of the Amsterdam Stock Exchange insurance brokers and other well established Dutch banks Once the Jews were deported their houses were emptied and the contents used to re furnish bombed out areas of the Reich In common with many other formerly Nazi occupied countries in Europe the Netherlands has been unable to retrieve many of its pre war assets More than fifty years after the wars end 20% of its most important pre war museum exhibits and approximately 80% of the less important works remain untrace **Het kopijrecht** Chris
