The Alumni Factor The Alumni Factor, 2013-09-10 This book began with a simple premise: that there is a better way to assess and rank colleges and universities in America than those currently being offered. The primary outcomes of most of today's rankings are 1) To provide readers a view of what life is like as an undergraduate, and 2) To give insight into who comes into the college. The Alumni Factor, on the other hand, is more interested in who comes out. The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate. The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes. The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today. In line with these goals, The Alumni Factor provides a detailed, in-depth profile of graduates from 225 of our nation's top colleges. The profiles were constructed almost entirely with data and insights from the actual college alumni themselves. Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic, social, and cultural choices available to capable students today.

academics get Or how greek or granola chill or up tight homogenous or diverse gay or straight a campus really is Lively irreverent and insightful the Students Guide to Colleges is the only guidebook that offers multiple perspectives on each school and tells it like it is so that college applicants can make the best choice when deciding where they want to spend their college years More than 30 000 students surveyed Preface by Chuck Hughes former senior dean of admissions at Harvard University

Breaking Ranks Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s

colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
