X App Compare:

A Comparison of Effort Estimation Techniques on Software Projects Karl Cox, 2023-04-05 Effort estimation is a core practice in software projects to help project managers work out the duration and cost of their project. This book compares different industry approaches to effort estimation and explains how to use each in a straightforward way with a real life case study example so the reader can learn to apply it immediately. The approaches covered here range from more traditional function points to agile story points and Kanban estimation techniques. The reader will also learn how to answer the question all managers dread: How is your project going with earned value analysis. There are exercises for the reader to apply the approaches with answers and explanations provided. This highly readable book is a valuable go-to resource for software project managers, teachers of software project management, and students of computer science, information systems, and software engineering who will become the project managers of the future. Tests and Proofs Bernhard K.

Aichernig, Carlo A. Furia, 2016-06-20 This book constitutes the refereed proceedings of the 10th International Conference on Tests and Proofs TAP 2016 held as part of STAF 2016 in Vienna, Austria, in July 2016. The 8 full papers, 2 short papers, and 1 tool demonstration paper presented in this volume were carefully reviewed and selected from 19 submissions. The book also contains one invited talk in full paper length. The TAP conference promotes research in verification and formal methods that targets the interplay of proofs and testing, the advancement of techniques of each kind, and their combination with the ultimate goal of improving software and system dependability. **Cone Penetrometer Comparison Testing** James A.

Schneider, Jonathan N. Hotstream, 2011 A total of 61 cone penetration tests were performed at 14 sites in the state of Wisconsin. Data reinforced conclusions from practice in Minnesota and previously performed test programs related to the Marquette Interchange and Mitchell interchange project that use of the CPT can be successful in glacial geologies. Within this study, CPTs were performed to depths in excess of 75 feet in alluvial deposits, outwash, and lacustrine soils. Difficulties were encountered in clay tills and fill placed for highway structures. However, previous experience in Milwaukee by commercial CPT operators had success in clayey tills of eastern Wisconsin. ICT Use and Healthy Longevity Kun Wang, Hee Yun Lee, Qiushi Feng, Danan Gu, 2025-12-02 With the revolutionary technology advancement and the global population aging, there has been increasing recognition of the importance of the use of information and computer technology (ICT) among older people, and the need for ICT inclusivity to ensure that all older individuals can benefit equally from modern technology. ICT use is also considered to have the potential to promote healthy longevity by telehealth and health monitoring, social connections, cognitive stimulation, access to information, and lifelong learning, among others. Although there are growing empirical studies on ICT use at older ages, a good summary and review of the current findings, especially from those of non-Western societies, is largely absent. Based on a wide range of evidence-based analyses and real-world examples, and a more refined scheme of measures, this book presents the most updated findings in the field, conducts analyses from cross-national

and multicultural lens and offers multidisciplinary and comprehensive insights on how individual cultural societal and institutional factors shape ICT use and healthy aging across nations The wide scope and the holistic approach of the book makes it a timely and valuable resource for researchers practitioners policymakers healthcare professionals other stakeholders and anyone interested in understanding the role of ICT in promoting healthy aging and improving the lives of older adults
