TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment

(Updated 2019) U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way. **Tip 61 - Behavioral Health Services for American Indians and Alaska Natives** U.S. Department of Health and Human Services, 2019-03-17 American Indians and Alaska Natives have consistently experienced disparities in access to healthcare services, funding, and resources, quality and quantity of services, treatment outcomes, and health education and prevention services. Availability, accessibility, and acceptability of behavioral health services are major barriers to recovery for American Indians and Alaska Natives. Common factors that influence engagement and participation in services include availability of transportation and child care, treatment infrastructure, level of social support, perceived provider effectiveness, cultural responsiveness of services, treatment settings, geographic locations, and tribal affiliations. *Psychiatric-Mental Health Guidelines for Advanced Practice Nurses* Brenda Marshall, Julie Bliss, Suzanne Drake, 2024-11-20 Delivers a breadth of content encompassing all aspects of psychiatric mental health care along the provider continuum. This unique clinical reference supports APRNs and PMH NPs as they strive to provide high-quality, evidence-based care to patients with mental health issues and conditions. Designed to support the ongoing needs and changing practice requirements of these nursing professionals, this new text provides a comprehensive examination of best practice psychiatric methods, ethical concerns, patient assessment and management strategies. These accessible guidelines for clinicians in a variety of settings bring together scientific skills backed by theory and professional knowledge along with helpful recommendations to bolster the clinician's psychiatric skills. With an easy-to-navigate format, the book encompasses five distinct sections covering general psychiatric nursing guidelines, diagnostic-specific procedures, and patient treatment planning, cultural and other considerations for special populations, the administrative basics for establishing an APRN practice, and additional topics related to mental health. Reflecting expertise from authors versed in varied practice fields and

numerous subspecialties the resource combines evidence based practice advanced research and practical humanistic approaches Key Features Provides comprehensive psychiatric mental health guidelines to advanced practice nurses in easy to access format Delivers step by step coverage of conducting psychiatric assessments and making referrals Covers polypharmacy differential diagnosis and patient education Includes coverage of special populations including LGBTQ homeless and indigent veterans and survivors of war and many others *Angstfrei durch Ernährung* Uma
