Cognitive and Motor Skills in

Sports Sabine Schaefer, Karen Zentgraf, Kylie Ann Steel, 2025-08-28 The intersection of cognitive processes and motor skills in sports has garnered significant attention in the field of psychology. Understanding the intricate relationship between cognitive functioning and motor performance is crucial for enhancing athletic training performance and overall sports expertise. The advent of advanced technologies such as motion capture systems and neuroimaging techniques has provided researchers with valuable tools to investigate the cognitive and motor aspects of sports performance. This Research Topic aims to consolidate the latest research and advancements in the domain of cognitive and motor skills in sports. The objective of this Collection is to expand and consolidate the existing knowledge on cognitive and motor skills in sports with a specific emphasis on the aforementioned studies. By bringing together multidisciplinary perspectives, the aim is to deepen our understanding of the complex interplay between cognitive processes and motor skills in sports performance. Additionally, this special issue seeks to promote the development of innovative approaches and interventions for enhancing cognitive and motor skills in athletes.
