Diniz, 2025-09-22 The three volume set LNCS 15900 15902 constitutes the proceedings of the 31st European Conference on Parallel and Distributed Processing Euro Par 2025 which took place in Dresden Germany during August 25 29 2025 The 78 papers included in these proceedings were carefully reviewed and selected from 264 submissions They were organized in topical sections as follows Part I Programming compilers and performance scheduling resource management cloud edge computing and workflows Part II Architectures and accelerators data analytics AI and computational science Part III Theory and algorithms multidisciplinary domain specific and applied parallel and distributed computing Exploration of

semiconductor Product Andrew J, 2024-05-11 The semiconductor market refers to the industry involved in the design development manufacturing and distribution of semiconductors which are the building blocks of electronic devices Semiconductors are materials with electrical conductivity between that of conductors such as metals and insulators such as plastics They are primarily made of silicon although other materials like gallium arsenide germanium and indium phosphide are also used The semiconductor market has experienced significant growth over the years due to the increasing demand for electronic devices and advancements in technology The market is driven by various factors such as the growing demand of smartphones and mobile devices the expansion of the automotive industry the rise of Internet of Things IoT devices and the development of emerging technologies like artificial intelligence AI virtual reality VR and autonomous vehicles etc To sum up the semiconductor market is a dynamic and rapidly evolving industry that plays a critical role in shaping the modern technological landscape Its growth is driven by advancements in various sectors and it continues to be a key enabler of innovation and technological progress The range of individual technological elements necessary for the semiconductor industry is extensive leading to the publication of numerous technical books across various domains while it is understandable that advanced technologies specific to each company are not publicly disclosed due to concerns regarding

potential leaks These publications have undeniably played a significant role in aiding professionals and students for establishing a solid foundation of knowledge In addition to the importance of individual technologies it is necessary to examine what final products emerge as these technologies converge While consumer electronics such as PCs and smartphones vary there are common aspects among the semiconductor products that constitute them Should one seek more comprehensive materials it often entails a costly purchase of white paper In this book we aim to delve into a more in depth discussion of the semiconductor market with an emphasis on the product perspective To accomplish this we will extensively draw upon various academic and market resources Additionally in order to foster a comprehensive understanding of the market it is necessary to have a certain level of familiarity with technical elements Therefore some technical explanations alongside the discussions is provided In this book we primarily focus on the FAB Fabrication domain This book is divided into three major parts Part 1 provides an overview of the semiconductor market covering the definition significance supply chain structure regional characteristics challenges and more within the semiconductor industry Part 2 the major portion of this book offers a comprehensive explanation of the most widely used types of semiconductor products Particularly high market share products notably Microcomponents APs and memory semiconductors will have separate in depth descriptions provided in the appendix Finally Part 3 will outline the general process by which these products are designed focusing on a typical perspective up to the stage just before Foundry

reshaping entire sectors from finance to healthcare It traces the evolution of AI agents from early programs to today's sophisticated autonomous systems providing a taxonomy of agent types It then explores cutting edge tools and frameworks for development such as AutoGen Langgraph and CrewAI offering practical insights for their deployment Key focus areas include evaluating multiagent systems and coordination techniques addressing challenges in communication and conflict resolution The book presents case studies from banking insurance healthcare and cybersecurity showcasing how autonomous agents are automating tasks and driving innovation In turn the book provides in depth analyses of Agentic AI in emerging fields like gene editing robotics and business process automation demonstrating its potential to accelerate scientific research and value creation The discussion extends to economic ramifications examining impacts on macroeconomic trends microeconomic dynamics within businesses and the emergence of decentralized token based economies Throughout thought provoking questions encourage readers to consider the broader implications of these technological advances The work concludes with a critical examination of related safety and security considerations emphasizing the need for proactive measures Maintaining a forward looking perspective it prompts readers to consider how these technologies might reshape industries and society raising important questions about the changing nature of work ethical aspects and equitable distribution of benefits Bridging theoretical foundations and practical applications the book offers valuable insights for data scientists IT managers CIOs CAIOs CTOs business analysts and graduate students seeking to understand and apply AI's transformative potential across various industries

Kubernetes for Generative AI Solutions Ashok Srirama, Sukirti Gupta, 2025-06-06 Master the complete Generative AI project lifecycle on Kubernetes K8s from design and optimization to deployment using best practices cost effective strategies and real world examples Key Features Build and deploy your first Generative AI workload on Kubernetes with confidence Learn to optimize costly resources such as GPUs using fractional allocation Spot Instances and automation Gain hands on insights into observability infrastructure automation and scaling Generative AI workloads Purchase of the print or Kindle book includes a free PDF eBook Book Description Generative AI GenAI is revolutionizing industries from chatbots to recommendation engines to content creation but deploying these systems at scale poses significant challenges in infrastructure scalability security and cost management This book is your practical guide to designing optimizing and deploying GenAI workloads with Kubernetes K8s the leading container orchestration platform trusted by AI pioneers Whether you're working with large language models transformer systems or other GenAI applications this book helps you confidently take projects from concept to production You'll get to grips with foundational concepts in machine learning and GenAI understanding how to align projects with business goals and KPIs From there you'll set up Kubernetes clusters in the cloud deploy your first workload and build a solid infrastructure But your learning doesn't stop at deployment The chapters highlight essential strategies for scaling GenAI workloads in production covering model optimization workflow automation scaling GPU efficiency observability security and resilience By the end of

this book you ll be fully equipped to confidently design and deploy scalable secure resilient and cost effective GenAI solutions on Kubernetes What you will learn Explore GenAI deployment stack agents RAG and model fine tuning Implement HPA VPA and Karpenter for efficient autoscaling Optimize GPU usage with fractional allocation MIG and MPS setups Reduce cloud costs and monitor spending with Kubecost tools Secure GenAI workloads with RBAC encryption and service meshes Monitor system health and performance using Prometheus and Grafana Ensure high availability and disaster recovery for GenAI systems Automate GenAI pipelines for continuous integration and delivery Who this book is for This book is for solutions architects product managers engineering leads DevOps teams GenAI developers and AI engineers It s also suitable for students and academics learning about GenAI Kubernetes and cloud native technologies A basic understanding of cloud computing and AI concepts is needed but no prior knowledge of Kubernetes is required

KI-Anwendungen mit großen Sprachmodellen entwickeln Maria Johnsen ,2025-02-01 Dieses Buch bietet einen praxisorientierten Leitfaden zur Entwicklung von KI Anwendungen mit großen Sprachmodellen LLMs Während mein vorheriges Buch die theoretischen Grundlagen behandelte liegt der Fokus hier auf konkreten Anwendungsfällen und der praktischen Umsetzung KI fasziniert mich seit Jahren und ich habe festgestellt dass viele Entwickler Forscher und Unternehmer mit LLMs arbeiten möchten aber nicht wissen wo sie anfangen sollen Dieses Buch soll helfen das volle Potenzial dieser Technologie zu nutzen von Chatbots und virtuellen Assistenten bis hin zu Anwendungen in Gesundheitswesen Finanzen Film und Musik Neben der technischen Umsetzung gehe ich auch auf ethische Fragen wie Fairness und Voreingenommenheit ein Mein Ziel ist es Ihnen das nötige Wissen zu vermitteln um nicht nur leistungsfähige sondern auch verantwortungsbewusste KI Lösungen zu entwickeln Egal ob Sie Entwickler Forscher Fachkraft oder KI Enthusiast sind dieses Buch gibt Ihnen die Werkzeuge an die Hand um LLMs effektiv einzusetzen und innovative Anwendungen zu schaffen Ich freue mich darauf Sie auf dieser spannenden Reise zu begleiten

The Future of Inclusion: Bridging the Digital Divide with Emerging Technologies Dalia Magdi,Eman Karam,Mohamed Mamdouh,Joshi Amit,2025-09-30 The book is a collection of best selected research papers presented at the Fourth World Conference on Internet of Things Applications Future ITAF 2024 organized by ITAF Research Lab and Global Knowledge Research Foundation in Cairo during October 9 10 2024 It includes innovative works from researchers leading innovators business executives and industry professionals to examine the latest advances and applications for commercial and industrial end users across sectors within the emerging Internet of things ecosphere It shares state of the art as well as emerging topics related to Internet of things such as big data research emerging services and analytics Internet of things IoT fundamentals electronic computation and analysis big data for multi discipline services security privacy and trust IoT technologies and open and cloud technologies

AI Systems Performance Engineering Chris Fregly,2025-11-11 Elevate your AI system performance capabilities with this definitive guide to maximizing efficiency across every layer of your AI infrastructure In today s era of ever growing generative models AI Systems Performance Engineering provides engineers

researchers and developers with a hands on set of actionable optimization strategies Learn to co optimize hardware software and algorithms to build resilient scalable and cost effective AI systems that excel in both training and inference Authored by Chris Fregly a performance focused engineering and product leader this resource transforms complex AI systems into streamlined high impact AI solutions Inside you ll discover step by step methodologies for fine tuning GPU CUDA kernels PyTorch based algorithms and multinode training and inference systems You ll also master the art of scaling GPU clusters for high performance distributed model training jobs and inference servers The book ends with a 175 item checklist of proven ready to use optimizations Codesign and optimize hardware software and algorithms to achieve maximum throughput and cost savings Implement cutting edge inference strategies that reduce latency and boost throughput in real world settings Utilize industry leading scalability tools and frameworks Profile diagnose and eliminate performance bottlenecks across complex AI pipelines Integrate full stack optimization techniques for robust reliable AI system performance
