It is a new way to take pictures or video adding text or drawings over a mobile phone and send them to friends or family with specifications on how long the photo will be available for viewing. User can set a time of 1 to 10 seconds for the viewing. The timer starts to count down the predefined seconds when the recipient opens the message. Once the user downloads the app on his phone it is essential to register with username and set a password. Subsequently the app access the contact list on users phone to load friends. Additionally users can add other contacts beyond the existing one manually. Snapchat is a new way of sharing moments with friends on iPhone and Android. The company compares its product with a phone call where a record of the communication persists however the actual content of the communication does not. Even though Snapchat launched many products there is one key feature that they all share deletion. The app's mascot which is also used as logo is called Ghostface Chillah a name Brown derived from Ghostface Killah of the hip hop group Wu Tang Clan. Snapchat Inc is a privately held venture capital backed company headquartered in Venice California USA. The application was first launched in July 2011 as a result of Evan Spiegel's projects at Stanford University under the name Picaboo.
