Do Taxes Matter for Long-Run Growth? Harberger's Superneutrality Conjecture Mr.Gian Milesi-Ferretti,Mr.Enrique G. Mendoza,Patrick K. Asea,1995-08-01 Harberger's superneutrality conjecture contends that although in theory the mix of direct and indirect taxes affects investment and growth in practice growth effects of taxation are negligible This paper provides evidence in support of this view by testing the predictions of endogenous growth models driven by human capital accumulation The theoretical analysis highlights implications of different taxes for growth and investment in these models The empirical work is based on cross country regressions and numerical simulations using a new methodology for estimating aggregate effective tax rates Results show significant investment effects from income and consumption taxes that are consistent with small growth effects The results are robust to the introduction of other growth determinants

The Evolution of Modern States Sven Steinmo,2010-07-19 The Evolution of Modern States first published in 2010 is a significant contribution to the literatures on political economy globalization historical institutionalism and social science methodology The book begins with a simple question why do rich capitalist democracies respond so differently to the common pressures they face in the early twenty first century Drawing on insights from evolutionary theory Sven Steinmo challenges the common equilibrium view of politics and economics and argues that modern political economies are best understood as complex adaptive systems The book examines the political social and economic history of three different
