Programming Large Language Models with Azure Open AI Francesco Esposito, 2024-04-03 Use LLMs to build better business software applications Autonomously communicate with users and optimize business tasks with applications built to make the interaction between humans and computers smooth and natural Artificial Intelligence expert Francesco Esposito illustrates several scenarios for which a LLM is effective crafting sophisticated business solutions shortening the gap between humans and software equipped machines and building powerful reasoning engines Insight into prompting and conversational programming with specific techniques for patterns and frameworks unlock how natural language can also lead to a new advanced approach to coding Concrete end to end demonstrations featuring Python and ASP NET Core showcase versatile patterns of interaction between existing processes APIs data and human input Artificial Intelligence expert Francesco Esposito helps you Understand the history of large language models and conversational programming Apply prompting as a new way of coding Learn core prompting techniques and fundamental use cases Engineer advanced prompts including connecting LLMs to data and function calling to build reasoning engines Use natural language in code to define workflows and orchestrate existing APIs Master external LLM frameworks Evaluate responsible AI security privacy and accuracy concerns Explore the AI regulatory landscape Build and implement a personal assistant Apply a retrieval augmented generation RAG pattern to formulate responses based on a knowledge base Construct a conversational user interface For IT Professionals and Consultants For software professionals architects lead developers programmers and Machine Learning enthusiasts For anyone else interested in natural language processing or real world applications of human like language in software

Open AI and Computational Intelligence for Society 5.0 Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29 As technology rapidly advances the complexity of societal challenges grows necessitating intelligent solutions that can adapt and evolve However developing such solutions requires a deep understanding of computational intelligence CI and its application in addressing real world problems Moreover ethical considerations surrounding AI such as bias and accountability are crucial to ensure responsible development and deployment of intelligent systems Open AI and Computational Intelligence for Society 5.0 offers a comprehensive exploration of CI providing insights into intelligent systems theory design and application This book is a practical guide for scientists engineers and researchers seeking to develop thoughtful solutions for complex societal issues Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life

Business Challenges and Opportunities in the Era of Industry 5.0 Simon Grima, Salih Serkan Kaleli, Mehmet Baygin, Engin Boztepe, 2025-02-14 Industry 5.0 also known as the fifth industrial revolution is characterised by advanced technologies such as artificial intelligence the Internet of Things IoT and robotics in manufacturing and other industries The use of innovative technologies in Industry 5.0 can bring several benefits

to companies and the industrial sector including increased efficiency and productivity improved product quality and the ability to create new products and services In addition these technologies help businesses to reduce their environmental impact and operate more sustainably Business Challenges and Opportunities in the Era of Industry 5 0 discusses the development and current technologies within Industry 5 0 and how these apply to various disciplines and sectors such as education health finance production automotive and construction This book delves into various Industry 5 0 technologies and how these can improve production and give businesses a competitive edge to remain relevant in a rapidly changing business landscape The ESFIRM series collects quantitative and qualitative studies in areas relating to finance insurance and risk management Subjects of interest may include banking accounting auditing compliance sustainability behaviour management and business economics In the disruption of political upheaval new technologies climate change and new regulations it is more important than ever to understand risk in the financial industry Providing high quality academic research this book series provides a platform for authors to explore analyse and discuss current and new financial models and theories and engage with innovative research on an international scale

Hands-On AI Trading with Python, QuantConnect and AWS Jiri Pik, Ernest P. Chan, Jared Broad, Philip Sun, Vivek Singh, 2025-01-29 Master the art of AI driven algorithmic trading strategies through hands on examples in depth insights and step by step guidance Hands On AI Trading with Python QuantConnect and AWS explores real world applications of AI technologies in algorithmic trading It provides practical examples with complete code allowing readers to understand and expand their AI toolbelt Unlike other books this one focuses on designing actual trading strategies rather than setting up backtesting infrastructure It utilizes QuantConnect providing access to key market data from Algoseek and others Examples are available on the book's GitHub repository written in Python and include performance tearsheets or research Jupyter notebooks The book starts with an overview of financial trading and QuantConnect's platform organized by AI technology used Examples include constructing portfolios with regression models predicting dividend yields and safeguarding against market volatility using machine learning packages like SKLearn and MLFinLab Use principal component analysis to reduce model features identify pairs for trading and run statistical arbitrage with packages like LightGBM Predict market volatility regimes and allocate funds accordingly Predict daily returns of tech stocks using classifiers Forecast Forex pairs future prices using Support Vector Machines and wavelets Predict trading day momentum or reversion risk using TensorFlow and temporal CNNs Apply large language models LLMs for stock research analysis including prompt engineering and building RAG applications Perform sentiment analysis on real time news feeds and train time series forecasting models for portfolio optimization Better Hedging by Reinforcement Learning and AI Implement reinforcement learning models for hedging options and derivatives with PyTorch AI for Risk Management and Optimization Use corrective AI and conditional portfolio optimization techniques for risk management and capital allocation Written by domain experts including Jiri Pik Ernest Chan Philip Sun Vivek Singh and Jared Broad this book is essential for hedge fund

Mastering Microsoft Fabric Debananda Ghosh,2024-02-21 Learn and explore the capabilities of Microsoft Fabric the latest evolution in cloud analytics suites This book will help you understand how users can leverage Microsoft Office equivalent experience for performing data management and advanced analytics activity The book starts with an overview of the analytics evolution from on premises to cloud infrastructure as a service IaaS platform as a service PaaS and now software as a service SaaS version and provides an introduction to Microsoft Fabric You will learn how to provision Microsoft Fabric in your tenant along with the key capabilities of SaaS analytics products and the advantage of using Fabric in the enterprise analytics platform OneLake and Lakehouse for data engineering is discussed as well as OneLake for data science Author Ghosh teaches you about data warehouse offerings inside Microsoft Fabric and the new data integration experience which brings Azure Data Factory and Power Query Editor of Power BI together in a single platform Also demonstrated is Real Time Analytics in Fabric including capabilities such as Kusto query and database You will understand how the new event stream feature integrates with

OneLake and other computations You also will know how to configure the real time alert capability in a zero code manner and go through the Power BI experience in the Fabric workspace Fabric pricing and its licensing is also covered After reading this book you will understand the capabilities of Microsoft Fabric and its Integration with current and upcoming Azure OpenAI capabilities What You Will Learn Build OneLake for all data like OneDrive for Microsoft Office Leverage shortcuts for cross cloud data virtualization in Azure and AWS Understand upcoming OpenAI integration Discover new event streaming and Kusto query inside Fabric real time analytics Utilize seamless tooling for machine learning and data science Who This Book Is For Citizen users and experts in the data engineering and data science fields along with chief AI officers

Generative AI: Current Trends and Applications Khalid Raza,Naeem Ahmad,Deepak Singh,2024-12-09 This comprehensive volume focuses on the latest advancements in Generative AI including state of the art techniques and models that are pushing the boundaries of what is possible It covers recent developments in areas such as Generative AI models transfer learning and Natural Language Processing NLP highlighting their potential to revolutionize content generation and creative applications including OpenAI LangChain NLTK and their practical implementations across diverse domains The volume provides insights into emerging research areas novel architectures and innovative approaches in Generative AI giving searchers a glimpse into the exciting future of the field The aim is to offer readers a deep understanding of Generative AI and how it can be harnessed to tackle complex real world challenges

AI Empowered Digital Business Innovation Parag Kulkarni,Jay Rajasekera,Bidyut Baran Chaudhuri,2025-06-17 Digital business innovation is not simply about using new technologies and upgrading business plans but about upgrading your strategic thinking and embedding AI in the thought process This book covers digital technologies and the strategic landscape of digital entrepreneurship It elaborates how AI advances converge to create new learning and business opportunities It includes digital business innovation technologies AI strategies for businesses and learning and collaborative learning strategies Digital business innovation empowers business or changes the paradigm of business and at times redefines it with intelligent technologies This in turn helps organizations and businesses create better value for customers and address problems that were not possible to address in the past Digital business innovation can be approached at three levels to increase contextual participation It includes focused business innovation strategic AI innovation and intelligent implementation The book contains real life stories of digital business innovation from companies in countries such as Japan the USA India and Singapore The authors have contributed and witnessed these technological innovations and hence bring first hand experience to help readers participate in this journey It is the journey to create new success stories through AI research that empowers business transformation

Developing Apps with GPT-4 and ChatGPT Olivier Caelen,Marie-Alice Blete,2024-07-10 This book provides an ideal guide for Python developers who want to learn how to build applications with large language models Authors Olivier Caelen and Marie Alice Blete cover the main features and benefits of GPT 4 and GPT 3 5 models and explain how they work You ll also get a step by

step guide for developing applications using the OpenAI Python library including text generation Q A and smart assistants Written in clear and concise language Developing Apps with GPT 4 and ChatGPT includes easy to follow examples to help you understand and apply the concepts to your projects Python code examples are available in a GitHub repository and the book includes a glossary of key terms Ready to harness the power of large language models in your applications This book is a must You ll learn Fundamentals and benefits of GPT 4 and GPT 3 5 models including the main features and how they work How to integrate these models into Python based applications leveraging natural language processing capabilities and overcoming specific LLM related challenges Examples of applications demonstrating the OpenAI API in Python for tasks including text generation question answering content summarization classification and more Advanced LLM topics such as prompt engineering fine tuning models for specific tasks RAG plug ins LangChain LlamaIndex GPTs and assistants Olivier Caelen is a machine learning researcher at Worldline and teaches machine learning courses at the University of Brussels Marie Alice Blete a software architect and data engineer in Worldline s R D department is interested in performance and latency issues associated with AI solutions

[Female Robots and AI in Science Fiction Cinema](#) Rebecca L. Jones, 2025-08-13 This book is the first comprehensive overview of the history of female presenting AI and robots in US and UK live action science fiction films from 1949 to 2023 It offers an original taxonomy that aids in the examination of 80 films and over 135 characters representations starting with The Perfect Woman 1949 and ending with Robots 2023 Using its representational taxonomy this book analyses the evolution of these depictions showing the continuations revisions and shifts in the depiction of female presenting AI and robots from objectified eroticised subordinated things to being autonomous moral agents who assert their right to equality and refuse their abusive typically sexual use This book shows how these fictional gendered constructions are products of a heterosexual cisgender male fantasy of an idealised subordinated form of femininity These artificial characters along with their real world counterparts highlight a desire for a subordinated femininity but also show how that subordination is a social construction often reinforced and countered in onscreen depictions By examining the trends within its asserted Galatea Girlfriend Mother and Deadly Seductress types this book presents an exploration of what our female presenting artificial creations could be while addressing their contemporary and our current AI technologies and how science fiction is influencing real life while our reality seeks to mirror science fiction

ChatGPT for Cybersecurity Cookbook Clint Bodungen, 2024-03-29 Master ChatGPT and the OpenAI API and harness the power of cutting edge generative AI and large language models to revolutionize the way you perform penetration testing threat detection and risk assessment Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Enhance your skills by leveraging ChatGPT to generate complex commands write code and create tools Automate penetration testing risk assessment and threat detection tasks using the OpenAI API and Python programming Revolutionize your approach to cybersecurity with an AI powered toolkit Book Description Are you ready to unleash the potential of AI driven cybersecurity

This cookbook takes you on a journey toward enhancing your cybersecurity skills whether you're a novice or a seasoned professional. By leveraging cutting-edge generative AI and large language models such as ChatGPT, you'll gain a competitive advantage in the ever-evolving cybersecurity landscape. ChatGPT for Cybersecurity Cookbook shows you how to automate and optimize various cybersecurity tasks including penetration testing, vulnerability assessments, risk assessment, and threat detection. Each recipe demonstrates step by step how to utilize ChatGPT and the OpenAI API to generate complex commands, write code, and even create complete tools. You'll discover how AI-powered cybersecurity can revolutionize your approach to security, providing you with new strategies and techniques for tackling challenges. As you progress, you'll dive into detailed recipes covering attack vector automation, vulnerability scanning, GPT-assisted code analysis, and more. By learning to harness the power of generative AI, you'll not only expand your skillset but also increase your efficiency. By the end of this cybersecurity book, you'll have the confidence and knowledge you need to stay ahead of the curve, mastering the latest generative AI tools and techniques in cybersecurity.

What you will learn:

- Master ChatGPT prompt engineering for complex cybersecurity tasks.
- Use the OpenAI API to enhance and automate penetration testing.
- Implement artificial intelligence-driven vulnerability assessments and risk analyses.
- Automate threat detection with the OpenAI API.
- Develop custom AI-enhanced cybersecurity tools and scripts.
- Perform AI-powered cybersecurity training and exercises.
- Optimize cybersecurity workflows using generative AI-powered techniques.

Who this book is for: This book is for cybersecurity professionals, IT experts, and enthusiasts looking to harness the power of ChatGPT and the OpenAI API in their cybersecurity operations. Whether you're a red teamer, blue teamer, or security researcher, this book will help you revolutionize your approach to cybersecurity with generative AI-powered techniques.

A basic understanding of cybersecurity concepts along with familiarity in Python programming is expected. Experience with command-line tools and basic knowledge of networking concepts and web technologies is also required.

Artificial Intelligence for Business Kamales Lardi, 2025-04-03

Understand and harness the power of artificial intelligence to drive growth and innovation with this comprehensive guide. As AI continues to evolve, it is increasingly important for businesses to make informed decisions about how to use AI to drive success and growth. Artificial Intelligence for Business aims to provide a comprehensive understanding of AI and its applications in business, making it the ideal resource for business managers and leaders looking to stay ahead of the curve. With a focus on practical applications, it helps readers understand what AI is, how it is transforming business, how it can be used to innovate, and how to navigate the realities of implementation. This book looks at the combination of AI with other emerging technologies such as blockchain, internet of things, and virtual and augmented reality, showing how these can work together to create new business opportunities and solve complex business problems. It provides guidance on the importance of designing AI applications that are human-centred, including inclusive design and empathy in AI. It also features contributions and insights from leading experts and a wealth of real-world examples profiling AI adoption and innovation.
