Move Fast and Break Things Jonathan Taplin, 2017-04-18 The book that started the Techlash A stinging polemic that traces the destructive monopolization of the Internet by Google Facebook and Amazon and that proposes a new future for musicians journalists authors and filmmakers in the digital age Move Fast and Break Things is the riveting account of a small group of libertarian entrepreneurs who in the 1990s began to hijack the original decentralized vision of the Internet in the process creating three monopoly firms Facebook Amazon and Google that now determine the future of the music film television publishing and news industries Jonathan Taplin offers a succinct and powerful history of how online life began to be shaped around the values of the men who founded these companies including Peter Thiel and Larry Page overlooking piracy of books music and film while hiding behind opaque business practices and subordinating the privacy of individual users in order to create the surveillance marketing monoculture in which we now live The enormous profits that have come with this concentration of power tell their own story Since 2001 newspaper and music revenues have fallen by 70 percent book publishing film and television profits have also fallen dramatically Revenues at Google in this same period grew from 400 million to 74.5 billion Today Google's YouTube controls 60 percent of all streaming audio business but pay for only 11 percent of the total streaming audio revenues artists receive More creative content is being consumed than ever before but less revenue is flowing to the creators and owners of that content The stakes here go

far beyond the livelihood of any one musician or journalist As Taplin observes the fact that more and more Americans receive their news as well as music and other forms of entertainment from a small group of companies poses a real threat to democracy Move Fast and Break Things offers a vital forward thinking prescription for how artists can reclaim their audiences using knowledge of the past and a determination to work together Using his own half century career as a music and film producer and early pioneer of streaming video online Taplin offers new ways to think about the design of the World Wide Web and specifically the way we live with the firms that dominate it
