Popular Music in a Digital Music Economy Tim Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments

Confessions of a Record Producer Moses Avalon, 2016-03-01 Book
For more than 15 years *Confessions of a Record Producer* has exposed the inner workings of the music business and empowered artists to protect their interests. With inside knowledge and hard numbers, Moses Avalon reveals the truth of how the industry functions or dysfunctions, showing what artists actually make from their hits and how producers, labels, managers, and even the artists' own lawyers conspire to rip them off. This is the only music business trade book that intimately analyzes the differences between ASCAP, BMI, and SESAC. Compares different types of record deals using real world math and dollar figures. Speaks critically about relationships between big industry entities and how they can hurt artists. Gives the reasoning behind major industry trends and decisions, particularly recent deals with Spotify, Apple, etc. Since the first edition's release in 1998, *Confessions* has grown from an underground favorite to a widely read staple, evolving along the way to address Internet age realities and the pitfalls coming with rapidly changing technologies. This new fifth edition tackles the complexities of music streaming and how the diminishing revenue it provides is becoming the new normal for an industry that has shrunk by half in less than two decades. Fully updated with recent industry developments and the latest scams, *Confessions of a Record Producer* remains a must for artists who want to survive, thrive, and get their fair share.

Global Meets Digital Vinod Jain, 2023-06-02
The world today is at the intersection of two megatrends: Globalization and Digitalization, a business revolution unfolding in real time. *Global Meets Digital* captures the many nuances of this revolution succinctly, including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years, such as diminishing returns to scale and resource scarcity, are no longer valid for a large and growing number of products and services. The book will challenge you to think differently, not just about digital products but also about physical products. In the global digital world, products are of three kinds: physical, digital, and smart machines—products that are both physical and digital and connected to the Internet, a distinction missed by most books on strategy and global business. The economics of each kind of product is distinct from that of the others, which has strategic implications for all kinds of businesses, such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take all, market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value

creation and value capture in both B2C and B2B contexts The book derives its underpinnings from the practice of global and digital business while theory remains in the background Intended specifically for an executive professional audience Global Meets Digital should also be of value to business students and professors learning to dip their toes into a digital world Vinod Jain is an expert in global and digital strategy award winning professor Fulbright Scholar and author of an MBA textbook Global Strategy He taught at the Rutgers Business School Newark and New Brunswick and the Robert H Smith School of Business University of Maryland College Park At Maryland he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School s Executive MBA program in China Since leaving Maryland he has taught in China Denmark Finland Poland and India as a visiting or term professor His opinion pieces have appeared in The Washington Post The Baltimore Sun Mensa Bulletin and Economic Times and Mint India s 1 and 2 business dailies among other media In the past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta

Living with Algorithms Ignacio Siles, 2023-04-25 A nuanced account from a user perspective of what it's like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In *Living with Algorithms* Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us *Living with Algorithms* clarifies the debate over the future

of datafication and whether we have a say in its development Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies
