Taxation of Petroleum Products Mrs. Poonam Gupta, Mr. Walter Mahler, 1994-03-01 The domestic taxation of petroleum products is an important source of revenue in most countries. However, there is a wide variation of tax rates on petroleum products across countries which cannot be explained by economic theory alone. This paper surveys different considerations advanced for taxing petroleum and presents petroleum tax rate data in 120 countries. It concludes that a significant reduction in the present extremely wide variation in petroleum prices and tax rates appears warranted.

Ungleichheit Anthony B. Atkinson, 2016-08-13 Soziale Ungleichheit ist das Grundproblem unserer Zeit. Zwischen Superreich und Bettelarm klafft heute weltweit ein Abgrund, der tiefer und breiter ist, denn je. Was sollten wir tun? Seine Antwort darauf bringt Atkinson in einem epochenmachenden Meisterwerk auf den Punkt. Ein Prozent der Weltbevölkerung besitzt über 50 Prozent des Weltvermögens. Tendenz steigend. 99 Prozent der Weltbevölkerung diskutieren und verzweifeln, handeln aber nicht. Soziale Ungleichheit ist für Anthony Atkinson den weltweit führenden Experten ganz oben auf der Agenda der Weltprobleme. Man kann fast alle tagespolitischen Konflikte, die Flüchtlings- und Eurokrise, den Terrorismus und die Kriege im Nahen Osten auf sie zurückführen. Gegen die lähmende Untätigkeit legt der britische Ökonom ein Programm für den Wandel vor und empfiehlt 15 konkrete Maßnahmen für die Bereiche Technologie, Arbeit, soziale Sicherheit sowie Kapital und Steuern. Ein Meisterwerk, das Analyse, Aufklärung, Appell und Handlungsanleitung miteinander verwebt.

Taxation and the Cost of Capital in Hungary and Poland International Monetary Fund, 1990-12-01 This paper compares the effective rates of taxation faced by a representative investor located in a major capital exporting country for investments in machinery and buildings in nine capital importing European countries. Poland and Hungary are found to have relatively high effective tax rates on equity financed investment. The analysis suggests that both countries would benefit from streamlining capital cost recovery allowances and possibly lowering statutory corporate tax rates as permitted by the revenue constraint rather than providing tax preferences for foreign investors.

A Cross-Country Analysis of the Tax-Push Hypothesis Fiorella Padoa-Schioppa,1992-02-01 This paper presents a microeconomic theoretical model of union optimizing behavior which is then used to test the relevance of the tax push hypothesis for wage formation in nine Western European countries Two factors the compensation and the progressivity effects are shown by the model to account for the effect if any of tax rates on wage formation A wage equation tested for the period 1960 1988 shows that in general small open economies have negligible compensation and progressivity effects while in larger economies direct indirect and social security tax rates are transferred onto the real labor cost All countries show a weakening of the tax shifting starting at the end of the 1970s or the beginning of the 1980s **Tax Policy and the**

Yitzhaki,1995-08-01 It is argued that taxation causes three kinds of deadweight losses and two types of direct costs The deadweight losses arise from substitution evasion and avoidance activities while the direct costs are administrative and compliance costs Some of these social costs tend to be discontinuous and or nonconvex Because most models of taxation ignore some components of the social costs of taxation their conclusions cannot be of a general nature An alternative approach to policy evaluation is to rely on a marginal efficiency cost of funds rule which can indicate appropriate directions of reforms The paper discusses its merits applicability and limitations as well as its relationship to other concepts **The**

Relevance of Fiscal Conditions for the Success of European Monetary Integration International Monetary Fund,1989-01-01 The paper argues that international differences in fiscal conditions influence the relative attractiveness of locating production facilities in different countries and could prove to be a troublesome source of instability for the European economies Even though physical capital movements tend to occur slowly divergent fiscal conditions can exert pressures on exchange rates in the short run and the monetary policy reactions induced in a fixed exchange rate regime may affect real wage rates and or employment levels The implications for tax harmonization and budget discipline are discussed It is argued

that monetary integration itself will not induce fiscal discipline

The Taxation of Financial Assets Mr. John R. King, Mr. Vito Tanzi, 1995-05-01 Taxes affect the degree and efficiency of financial intermediation in many different ways This paper summarizes the main tax provisions in OECD countries that affect the overall tax wedge between pre tax returns on investments and the post tax yield on the savings that finance them This tax wedge is shown to vary widely in individual countries according to the different ways in which savings are channeled through financial markets The paper then discusses alternative criteria for assessing tax regimes for financial assets and summarizes recent trends in OECD countries

Tax Reform in Economies in Transition Mr. Vito Tanzi, 1991-03-01 The transition from a command to a market economy requires profound reforms of the tax system Such a transition will put downward pressures on the level of taxation at a time when public expenditure remains high This paper outlines the main characteristics of the tax systems in centrally planned economies It describes recent changes in those tax systems Finally it discusses the major difficulties that will be faced and the errors that must be avoided during the transition

The Optimal Mix of Inflationary Finance and Commodity Taxation with Collection Lags Mr. Avinash K. Dixit, 1990-09-01 When there are collection lags in the tax system inflation reduces the real revenues This is often offered as an argument for less reliance on the inflation tax But the optimal rates of other taxes should also be reconsidered in the light of collection lags When this is done the focus shifts from the revenues which can be recouped by changing the rates of these taxes to the associated costs of collection In a benchmark case where the average costs of collection are constant the optimal inflation tax is independent of the collection lag
