Artificial Intelligence in HCI Helmut Degen, Stavroula Ntoa, 2023-07-08. This double volume book set constitutes the refereed proceedings of the 4th International Conference AI HCI 2023, held as part of the 25th International Conference HCI International 2023, which was held virtually in Copenhagen, Denmark, in July 2023. The total of 1578 papers and 396 posters included in the HCI 2023 proceedings were carefully reviewed and selected from 7472 submissions. The first volume focuses on topics related to Human-Centered Artificial Intelligence, explainability, transparency, and trustworthiness, ethics, and fairness, as well as AI-supported user experience design. The second volume focuses on topics related to AI for language, text, and speech-related tasks, human-AI collaboration, AI for decision support and perception analysis, and innovations in AI-enabled systems.

Law, Human Creativity and Generative Artificial Intelligence Julija Kalpokienė, 2024-06-12. This book addresses the complex issue of human creativity in the age of Artificial Intelligence. Artificial intelligence (AI) is increasingly being used to create texts, images, and musical compositions. This increase in the application of AI within the creative industries can, of course, enhance human performance while producing creative and commercial challenges for human authors. Against this background, this book considers how current mechanisms for incentivising creativity, including legal regulations such as copyright, state funding, and tax regimes, are inadequate in the age of AI. Acknowledging the opportunity that AI presents, the book then proposes alternative regulatory mechanisms through which human creativity can be incentivised. This book will appeal to scholars and researchers in the areas of socio-legal studies, intellectual property law, media law, and law and technology.

Human-Computer Creativity Vladimir Geroimenko, 2025-06-16. This pioneering volume showcases how generative AI has evolved from a mere tool to a creative partner, transforming the boundaries of innovation and collaboration across various disciplines. With contributions from 53 global experts spanning 21 countries, this comprehensive resource explores the transformative impact of AI on education, art, and healthcare. It reveals how AI enhances learning experiences, fosters new artistic expressions, and revolutionises patient care and medical research. Organised into five thematic parts, the book offers a balanced mix of conceptual frameworks, case studies, and practical insights, providing

readers with a thorough understanding of how human ingenuity and artificial intelligence intersect to solve problems inspire creativity and redefine industries Whether you are an academic practitioner or inquisitive reader this volume invites you to engage with the cutting edge possibilities of generative AI and embrace the future of human computer collaboration
