each chapter now comprises the newest recipes and is revised to align with Python 3.8 and higher. The book includes three new chapters that focus on using Python for test automation, machine learning projects, and for working with messy data. This edition will enable you to develop a sharp understanding of the fundamentals required to automate business processes through real-world tasks such as developing your first web scraping application, analyzing information to generate spreadsheet reports with graphs, and communicating with automatically generated emails. Once you grasp the basics, you will acquire the practical knowledge to create stunning graphs and charts using Matplotlib, generate rich graphics with relevant information, automate marketing campaigns, build machine learning projects, and execute debugging techniques. By the end of this book, you will be proficient in identifying monotonous tasks and resolving process inefficiencies to produce superior and reliable systems. What you will learn: Learn data wrangling with Python and Pandas for your data science and AI projects; Automate tasks such as text classification, email filtering, and web scraping with Python; Use Matplotlib to generate a variety of stunning graphs, charts, and maps; Automate a range of report generation tasks from sending SMS and email campaigns to creating templates, adding images in Word, and even encrypting PDFs; Master web scraping and web crawling of popular file formats and directories with tools like BeautifulSoup; Build cool projects such as a Telegram bot for your marketing campaign, a reader from a news RSS feed, and a machine learning model to classify emails to the correct department based on their content; Create fire-and-forget automation tasks by writing cron jobs, log files, and regexes with Python scripting. Who this book is for: Python Automation Cookbook, Second Edition, is for developers, data enthusiasts, or anyone who wants to automate monotonous manual tasks related to business processes such as finance, sales, and HR, among others. Working knowledge of Python is all you need to get started with this book.
