public and political debates The ambition of this paper is to demonstrate that game studies are a resourceful field of work and can be beneficial to the humanities More importantly this work states that it is necessary to form an institutionalized frame of academic game research in order to retain the ability to describe and analyze a growing cultural and social phenomenon of unprecedented proportions Without game studies whole sectors of youth culture and virtual social networks will barely be accessible to academic research Above that the ability of digital games to imitate explain and even influence real world social systems is only a small part of the potential that will remain unexplored
