Lessambo, 2025-03-20 According to The International Association of Deposit Insurers IADI report in 2024 more than 146 countries jurisdictions have adopted deposit insurance systems to protect their banking systems Deposit insurance has different regulations across countries ranging from full to partial coverage from explicit to implicit appliance from being compulsory to non compulsory Deposit insurance may also differ in terms of premium implementation The most predominant argument in favor of deposit insurance systems arises from their ability to prevent bank runs which usually lead to asset liquidation and potentially to bank failure By preventing losses for individual depositors their incentive to withdraw deposits

before other depositors do so is limited if a DIS is in place To properly design a safety net countries need to balance two competing goals ensuring stability in the financial system when liquidity and solvency problems arise while minimizing moral hazard Deposit insurance is one element of the financial safety net that exists in many countries particularly developed countries The safety net aims to maintain the stability of the financial system by protecting the critical financial intermediation function of banks and their role in the national payments system Deposit insurance helps ensure depositors confidence in the financial system

Deposit Guarantee Schemes F. Arnaboldi,2015-12-05 Arnaboldi highlights the importance of one of the three pillars of the Banking Union the common mechanism for insuring deposits She claims that integrated financial markets require a European solution with regard to deposit insurance and that the establishment of a pan European scheme could address the problems for large cross border banks
