Sachs, 2010-12-01 For the past fifteen years Peru has suffered a profound and lasting economic crisis that threatens the stability of the country s fragile democratic system Economic mismanagement has led to plummeting per capita income accelerating inflation an annualized rate of nearly 3 000 percent by 1989 and widespread social upheaval This study by experts in the United States and Latin America offers a coherent proposal for economic stabilization and structural adjustment to restore economic growth but growth with equity to this distressed country The contributors provide background analysis and thorough diagnosis of Peru s economic problems They explain how inconsistent populist policies and the ensuing economic crisis have caused the standard of living to deteriorate dramatically paving the way for significant expansion of social violence political instability and isolation from the international financial community Peru s Path to Recovery offers an adjustment program that is sound but also is complemented by a social support program to assist the poor those who have suffered the most from previous disadjustment

This combination makes the program both equitable and politically sustainable With the inauguration of Alberto Fujimori Peru has the opportunity to embrace a new economic strategy to stabilize the economy curtail the extreme poverty and reduce the massive unemployment and underemployment Such a course will not be easy patterns of government business and social behavior will have to change But through such changes Peru can hope to become a stable thriving country once more
