Emission and Control of Trace Elements from Coal Derived Gas Streams presents an up to date and focused analysis on Trace element TE emissions and control strategies during coal utilization. This book provides insights into how TE s in coal are distributed from different coal forming periods, coal ranks, and coal bearing regions. As the emission and control of TE s during coal utilization are a significant concern, this book introduces TE s in coal and pollution in an accessible way, before discussing why they occur and how they are distributed during various stages of coal forming, also considering various regions and countries. Specific types of TE s in relation to partition in coal combustion, coal fires, gasification, and coal feed furnace are then analyzed, providing the reader with practical knowledge to apply to their own research or projects. This book is an essential reference for energy engineers researching and working in coal technology with a specific focus on emission control, as well as graduate students and researchers in energy engineering, environmental, thermal, and chemical engineering who have an interest in trace element emission and control from coal utilization. Presents characteristics of TE emissions during coal utilization in laboratory scale experiments, industrial furnaces, and power plants. Considers different legislation and case studies from various regions and countries. Includes contributions from world renowned experts. Presents a concise and focused analysis on TE emissions and control strategies. [Mercury Control](#) Evan J. Granite, Henry W. Coal Geology of China Shifeng Dai, Robert B. Finkelman, 2020-04-28 Coal and China to some extent have become synonymous. China is by far the largest user of coal in the world. In 2016, coal production in China amounted to 3.21 billion tons, about half of the total global coal production. Coal consumption accounts for more than 65% of primary energy consumption in China. The Chinese coal industry greatly contributes to the economic development in China, the second largest economy in the world. However, periodically ubiquitous images of smog blanketing major Chinese cities are viewed all over the world. Coal combustion is one of the important contributors to smog, which is considered to be a major

environmental and human health problem for China and other countries News stories also highlight the periodic coal mine disasters that kill hundreds of Chinese coal miners annually The need to address these and other human health environmental and mine safety issues and to maximize resource recovery and use justifies a vigorous coal research effort This book brings together experts on almost every aspect of coal geology coal production composition and use of the coal and its by products and coal s environmental and human health impacts The chapters in this book were originally published in a special issue of the International Geology Review *Inorganic Geochemistry of Coal* Shifeng Dai,Robert B. Finkelman,James C. Hower,David French,Ian T. Graham,Lei Zhao,2023-06-22 Inorganic Geochemistry of Coal explains how to determine the concentrations and modes of occurrence of elements in coal how to diminish adverse effects of toxic elements on the environment and human health which elements in coal could be industrially utilized and which elements can be successfully used as indications for deciphering depositional environments and tectonic evolution As coal use will remain at an all time high for the next several decades there is a critical need for understanding the properties of this fuel to ensure efficient use encourage its economic by product potential and to help minimize its negative technological environmental and health impacts Features dozens of never before published illustrations of critical features of the inorganic geochemistry of coal Covers both the theory and applications of the topic including case studies to serve as real world examples Includes a chapter on the health and environmental impacts of the mining development and use of coal **Continuous Emission Monitoring** James A.
