Online Science Learning: Best Practices and Technologies Downing, Kevin, Holtz, Jennifer, 2008-05-31 The continued growth in general studies and liberal arts and science programs online has led to a rise in the number of students whose science learning experiences are web based. However, little is known about what is actually going on in web based science courses at the level of the disciplines within liberal arts and sciences or the corresponding course design features. Online Science Learning: Best Practices and Technologies reviews trends and efforts in web based science instruction and evaluates contemporary philosophies and pedagogies of online science instruction. This title on an emergent and vital area of education clearly demonstrates how to enrich the academic character and quality of web based science instruction. **Girls and**

Women of Color In STEM Barbara Polnick, Julia Ballenger, Beverly Irby, Nahed Abdelrahman, 2020-09-01 Though there has been a rapid increase of women's representation in law and business, their representation in STEM fields has not been matched. Researchers have revealed that there are several environmental and social barriers including stereotypes, gender bias, and the climate of science and engineering departments in colleges and universities that continue to block women's progress in STEM. In this book, the authors address the issues that encounter women of color in STEM in higher education.

The Everything STEM Handbook Rihab Sawah, Anthony Clark, 2015-08-09 A guide for parents hoping to teach their kids the basics of STEM: Science, Technology, Engineering, and Mathematics. **How to STEM** Carol Smallwood, Vera Gubnitskaia, 2013-12-05 During the past few years, groups like the President's Council of Advisors on Science and Technology Center for Education have been placing great emphasis on the significance of STEM: science, technology, engineering, and math education. In brief, the US is seen as falling behind the rest of the world in science and technology education. In response, the curricula have been revised in many educational institutions and school districts across the country. It is clear that for STEM to be successful, other community organizations, most particularly libraries, need to be closely involved in the process. Library staff realize the importance of getting involved in STEM education, but many have difficulty finding comprehensive information that will help them plan and successfully implement STEM direction in their organization. This book is designed to meet that need. It is timely and relevant. *How to STEM: Science, Technology, Engineering, and Math Education in Libraries* is by and for libraries who are involved in contributing efforts into advancing these subjects. It is organized in 9 parts, including funding, grant writing, community partnerships, outreach, research, and examples of specific programming activities. Authors are drawn from the professional staffs of educational institutions, libraries, and non-profit organizations such as science museums. The book contains eight parts, each emphasizing a different aspect of how to succeed with STEM. Part 1 emphasizes how hands-on activities that are both fun and educational can be used to further STEM awareness. Parts 2 and 3 contain chapters on the uniting of STEM with Information Literacy. Innovative collection development ideas are discussed in Part 4, and Part 5 focuses on research and publishing. Outreach is the theme of Part 6, and the programs described in these chapters

offer an array of ways to connect with students of all ages The final section of *How to STEM Science Technology Engineering and Math Education in Libraries* addresses the funding of these programs Librarians of all types will be pleased to discover easy to implement suggestions for collaborative efforts many rich and diverse programming ideas strategies for improving reference services and library instruction to speakers of English as a second language marketing and promotional tips designed to welcome multicultural patrons into the library and much more *Best Practices in Online Teaching and Learning across Academic Disciplines* Ross C.
