

Generative AI Framework

Generative or conversational

Is this the sort of work a generative AI can do? Does it involve conversation or creation of new material? AI should probably not make decisions at this stage, but it can present/sort information and answer questions.

Valuable

The capabilities of the generative AI would meaningfully reduce manual effort in completing a task. Tasks that require extensive permissions, highly specific or contextual expertise, or could expose the organization to risk would not generally fall into this category.

Repeatable

Is the task repeatable such that it occurs frequently enough to train a model and recoup initial investment?
