The Ultimate Guide to Excellent Teaching and Training Dr. Jeffrey C. Fox, 2015-07-07 This book is for anyone interested or involved in teaching, training, or instructing, whether you are just getting into the field or thinking about it, or you have been teaching for decades. It is for those who administer teaching, training, or instructing. The book was written for academics and those who teach in academies and other professional adult learning environments. The book's contents are applicable to all types of colleges, be they community colleges, four year colleges, or universities, both private and public, for profit or nonprofit. Most professional practitioner type instructors go through some sort of instructor school; teachers earn degrees in teaching, but many who teach or instruct are never trained or taught how to teach or train. Few professors are taught how to teach. They have been taught so this is where they often draw their own teaching styles. Regardless of where you teach, train, or instruct, this book and its contents are for you. The book goes into great detail regarding face to face classes as well as online and other delivery methods. The lessons found in this book can be applied to new students, undergraduate or graduate students. The lessons apply equally to basic in service and specialized training. My hope is that no matter how great of an instructor you are, you will find many new nuggets of information that will add to your teaching toolbox. One of my goals in life is to leave a positive lasting impact. I want to help students and other instructors recognize and reach their full potential. I want you to be the best instructor you can be. I strongly believe we impact people all the time, whether we know it or not. You can and will make a big difference in your students' lives.

Caribbean Anti-Trafficking Law and Practice Jason Haynes,2019-07-11 This monograph investigates the International European and Commonwealth Caribbean approaches to human trafficking from an Analytical Eclectic perspective It presents a compelling empirically based argument that although there is currently a panoply of measures aimed at preventing human trafficking prosecuting offenders and protecting trafficked victims in both Europe and the Commonwealth Caribbean these measures have in practice been fraught with a number of challenges whether of a normative institutional or individual nature The continued existence of these challenges strongly suggests that there exists a disconnect between anti trafficking law and practice which is not peculiar to small island developing States since they also extend to developed States including the United Kingdom Although these challenges are not insurmountable this monograph advances

the argument that sustained social economic political and legal commitments are both necessary and desirable and that without such commitments only pyrrhic victories would be won in the fight to eradicate the scourge of the twenty first century Given the importance of the issue of human trafficking and its inescapable impact on victims families communities nations regions and the international community as a whole this monograph will serve as an important resource for policy makers scholars students and practitioners actively working in this increasingly dynamic area of law
