**Interactive Video-On-Demand Systems** T.P. Jimmy To, Babak Hamidzadeh, 2012-12-06 Interactive Video on Demand Systems Resource Management and Scheduling Strategies addresses issues in scheduling and management of resources in an interactive continuous media e.g. audio and video server. The book emphasizes dynamic and run-time strategies for resource scheduling and management. Such strategies provide effective tools for supporting interactivity with on-line users who require the system to be responsive in serving their requests and whose needs and actions vary frequently over time. With an emphasis on responsiveness and transient performance, this book elaborates on dynamic strategies for managing and scheduling resources in Video on Demand Multimedia systems. Unlike previous books, this volume presents an unprecedented detailed analysis of the start-up and departure of streams. It gives a comprehensive evaluation of various techniques as workloads are varied in multiple dimensions including arrival rate, data rate, and length of play. Interactive Video on Demand Systems Resource Management and Scheduling Strategies collectively addresses multiple issues including QoS, throughput, responsiveness, and efficiency. The solutions discussed in this volume are particularly valuable to practitioners who are building digital library, interactive multimedia, and hypermedia servers. Interactive Video on Demand Systems Resource Management and Scheduling Strategies is an excellent reference for researchers, practitioners, and educators in the field of multimedia systems and may be used for advanced courses on multimedia systems and Video on Demand servers.

**Video in Video-on-Demand Systems** Wu-Chi Feng,2007-08-26 Many emerging technologies such as video conferencing video on demand and digital libraries require the efficient delivery of compressed video streams For applications that require the delivery of compressed stored multimedia streams the a priori knowledge available about these compressed streams can aid in the allocation of server and network resources By using a client side buffer the resource requirements from the server and network can be minimized Buffering Techniques for Delivery of Compressed Video in Video on Demand Systems presents

a comprehensive description of buffering techniques for the delivery of compressed prerecorded multimedia data While these techniques can be applied to any compressed data streams this book focusses primarily on the delivery of video streams because of the large resource requirements that they can consume The book first describes buffering techniques for the continuous playback of stored video sources In particular several bandwidth smoothing or buffering algorithms that are provably optimal under certain conditions are presented To provide a well rounded discussion the book then describes extensions that aid in the ability to provide interactive delivery of video across networks Specifically reservation techniques that take into account interactive functions such as fast forward and rewind are described In addition extensions to the bandwidth smoothing algorithms presented in the first few chapters are described These algorithms are designed with interactive continuous playback of stored video in mind and are also provably optimal under certain constraints Buffering Techniques for Delivery of Compressed Video in Video on Demand Systems serves as an excellent resource for multimedia systems networking and video on demand designers and may be used as a text for advanced courses on the topic
