RAG-Driven Generative AI Denis Rothman, 2024-09-30 Minimize AI hallucinations and build accurate custom generative AI pipelines with RAG using embedded vector databases and integrated human feedback Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Implement RAG s traceable outputs linking each response to its source

document to build reliable multimodal conversational agents Deliver accurate generative AI models in pipelines integrating RAG real time human feedback improvements and knowledge graphs Balance cost and performance between dynamic retrieval datasets and fine tuning static data Book Description RAG Driven Generative AI provides a roadmap for building effective LLM computer vision and generative AI systems that balance performance and costs This book offers a detailed exploration of RAG and how to design manage and control multimodal AI pipelines By connecting outputs to traceable source documents RAG improves output accuracy and contextual relevance offering a dynamic approach to managing large volumes of information This AI book shows you how to build a RAG framework providing practical knowledge on vector stores chunking indexing and ranking You ll discover techniques to optimize your project s performance and better understand your data including using adaptive RAG and human feedback to refine retrieval accuracy balancing RAG with fine tuning implementing dynamic RAG to enhance real time decision making and visualizing complex data with knowledge graphs You ll be exposed to a hands on blend of frameworks like LlamaIndex and Deep Lake vector databases such as Pinecone and Chroma and models from Hugging Face and OpenAI By the end of this book you will have acquired the skills to implement intelligent solutions keeping you competitive in fields from production to customer service across any project What you will learn Scale RAG pipelines to handle large datasets efficiently Employ techniques that minimize hallucinations and ensure accurate responses Implement indexing techniques to improve AI accuracy with traceable and transparent outputs Customize and scale RAG driven generative AI systems across domains Find out how to use Deep Lake and Pinecone for efficient and fast data retrieval Control and build robust generative AI systems grounded in real world data Combine text and image data for richer more informative AI responses Who this book is for This book is ideal for data scientists AI engineers machine learning engineers and MLOps engineers If you are a solutions architect software developer product manager or project manager looking to enhance the decision making process of building RAG applications then you ll find this book useful

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United

States that are aimed at restraining platform capitalism are also discussed. The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications. This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism. The book concludes with a diagnosis of the global situation among the competing digital empires: the United States, the European Union and China, and considers whether or not, under the present conditions, any form of democratic platform socialism could materialize on a wider scale in the near future.

The 18 full papers and 92 short papers were carefully reviewed and selected from 200 submissions. They are organized in topical sections as follows: Part One: Blue Sky; Industry Innovation and Practitioner Wide; AIED and Late Breaking Results; Part Two: Late Breaking Results; Doctoral Consortium; Workshops and Tutorials.

MC Microsoft Certified Azure AI Fundamentals Study Guide Adora Nwodo, 2025-10-30. A fast and efficient prep handbook for the Azure AI Fundamentals certification exam. In MC Microsoft Certified Azure AI Fundamentals Study Guide Exam AI 900, experienced software engineer Adora Nwodo walks you through every technical topic you need to understand to succeed on the AI 900 certification exam and build a fundamental understanding of Azure AI features. The Study Guide uses the proven and popular Sybex approach to help you use Azure AI in the real world, whether you're in a technical or non-technical role. Nwodo offers clear explanations, step-by-step instructions, and visual aids to guide you through essential AI concepts and shows you how to use them in the Azure cloud. You'll learn about Artificial Intelligence concepts and workloads, Responsible AI use in Azure, Core concepts in AI models and solutions, Introduction to machine learning concepts including data preprocessing, training, and validation algorithms, and more. The application of machine learning concepts on the Azure cloud platform, Computer vision in Azure, Natural language processing concepts, Generative AI concepts, The Azure OpenAI Service, Example AI use cases, and industry specific applications. The MC Microsoft Certified Azure AI Fundamentals Study Guide highlights best practices for industry newcomers and veterans alike and builds the confidence you need to pass the AI 900 certification exam on your first attempt. Inside the book: Intuitively organized material and additional sample questions that allow you to selectively study the areas in which you need to improve. Carefully explained content appropriate for non-technical professionals who interact with AI technologies occasionally or on a daily basis. Complimentary access to the superior Sybex online learning environment and test bank including practice test questions, digital flashcards, and a glossary of key terms. Perfect for everyone preparing for the AI 900 certification exam, the Microsoft Certified Azure AI Fundamentals Study Guide is also a must-read for technical

and non technical professionals especially those working in AI impacted industries like sales and marketing who wish to expand their AI skillset and improve their effectiveness at work

Transforming Education With Generative AI: Prompt Engineering and Synthetic Content Creation Sharma, Ramesh C.,Bozkurt, Aras,2024-02-07 The rise of generative Artificial Intelligence AI signifies a momentous stride in the evolution of Large Language Models LLMs within the expansive sphere of Natural Language Processing NLP This groundbreaking advancement ripples through numerous facets of our existence with education AI literacy and curriculum enhancement emerging as focal points of transformation Within the pages of **Transforming Education With Generative AI Prompt Engineering and Synthetic Content Creation** readers embark on a journey into the heart of this transformative phenomenon Generative AI s influence extends deeply into education touching the lives of educators administrators policymakers and learners alike Within the pages of this book we explore the intricate art of prompt engineering a skill that shapes the quality of AI generated educational content As generative AI becomes increasingly accessible this comprehensive volume empowers its audience by providing them with the knowledge needed to navigate and harness the potential of this powerful tool

Mastering ChatGPT George Grätzer,2025-07-21 With over 100 million users in its first few months and growing exponentially ChatGPT has revolutionized how we think and work From creative writing to customer support and from education to healthcare it has sparked a global transformation But how can you and your business unlock its full potential **Mastering ChatGPT Prompts and Beyond** offers practical guidance to help you maximize ChatGPT s capabilities This comprehensive guide delves into the core of ChatGPT presenting actionable insights real world case studies engaging exercises and proven strategies Learn how to craft impactful prompts overcome ChatGPT s limitations and tailor its features to your specific goals From sparking creative breakthroughs to revolutionizing business strategies this book s expert guidance on mastering ChatGPT will transform the way you engage with AI and unlock its full potential Packed with examples of ChatGPT s applications in customer support education healthcare and beyond **Mastering ChatGPT Prompts and Beyond** paints a vivid picture of an AI powered future and equips you to be part of it

Large Language Models LLMs have emerged as a cornerstone technology transforming how we interact with information and redefining the boundaries of artificial intelligence LLMs offer an unprecedented ability to understand generate and interact with human language in an intuitive and insightful manner leading to transformative applications across domains like content creation chatbots search engines and research tools While fascinating the complex workings of LLMs their intricate architecture underlying algorithms and ethical considerations require thorough exploration creating a need for a comprehensive book on this subject This book provides an authoritative exploration of the design training evolution and application of LLMs It begins with an overview of pre trained language models and Transformer architectures laying the groundwork for understanding prompt based learning techniques Next it dives into methods for fine tuning LLMs integrating reinforcement learning for value alignment and the convergence of LLMs with computer vision robotics and speech processing The book strongly emphasizes practical applications detailing real world use cases such as conversational chatbots retrieval augmented generation RAG and code generation These examples are carefully chosen to illustrate the diverse and impactful ways LLMs are being applied in various industries and scenarios Readers will gain insights into operationalizing and deploying LLMs from implementing modern tools and libraries to addressing challenges like bias and ethical implications The book also introduces the cutting edge realm of multimodal LLMs that can process audio images video and robotic inputs With hands on tutorials for applying LLMs to natural language tasks this thorough guide equips readers with both theoretical knowledge and practical skills for leveraging the full potential of large language models This comprehensive resource is appropriate for a wide audience students researchers and academics in AI or NLP practicing data scientists and anyone looking to grasp the essence and intricacies of LLMs

Key Features Over 100 techniques and state of the art methods including pre training prompt based tuning instruction tuning parameter efficient and compute efficient

fine tuning end user prompt engineering and building and optimizing Retrieval Augmented Generation systems along with strategies for aligning LLMs with human values using reinforcement learning Over 200 datasets compiled in one place covering everything from pre training to multimodal tuning providing a robust foundation for diverse LLM applications Over 50 strategies to address key ethical issues such as hallucination toxicity bias fairness and privacy Gain comprehensive methods for measuring evaluating and mitigating these challenges to ensure responsible LLM deployment Over 200 benchmarks covering LLM performance across various tasks ethical considerations multimodal applications and more than 50 evaluation metrics for the LLM lifecycle Nine detailed tutorials that guide readers through pre training fine tuning alignment tuning bias mitigation multimodal training and deploying large language models using tools and libraries compatible with Google Colab ensuring practical application of theoretical concepts Over 100 practical tips for data scientists and practitioners offering implementation details tricks and tools to successfully navigate the LLM life cycle and accomplish tasks efficiently

Building Multimodal Generative AI and Agentic Applications Indrajit Kar, 2025-10-27

DESCRIPTION Generative AI and agentic AI are reshaping how we interact with data enabling intelligent systems that can reason generate and autonomously act across multiple modalities From text and images to voice and structured data these technologies are increasingly essential in enterprise and research applications today This book offers a complete roadmap to mastering multimodal generative AI and agentic AI systems It covers foundational concepts vision language models retrieval augmented generation human in the loop and multi agent workflows text to SQL OCR and hybrid AI integrations Each chapter combines theory practical guidance code implementations and real world case studies helping readers understand architectures pipelines and production grade deployments By the end of this book readers will be capable of designing implementing and scaling robust multimodal and agentic AI systems They will gain hands on expertise in reasoning generation retrieval agent orchestration and Ops equipping them to build production ready AI applications and excel in their roles

WHAT YOU WILL LEARN Understand multimodal generative AI and agentic AI systems Architecting RAG vector DBs embeddings cross encoders and core agentic planning Build retrieval augmented generation workflows efficiently Implement human in the loop and multi agent pipelines Apply text to SQL for real time data queries Develop OCR solutions for images and documents Integrate traditional ML models with GenAI workflows Deploy production grade AI with monitoring and observability

WHO THIS BOOK IS FOR This book is for AI enthusiasts data scientists ML engineers and software developers with foundational Python and ML knowledge It is ideal for tech leads researchers and enterprise architects aiming to build and scale multimodal production grade agentic AI systems
