Rhetorical Machines John Jones, Lavinia Hirsu, 2019-07-02 A landmark volume that explores the interconnected nature of technologies and rhetorical practice Rhetorical Machines addresses new approaches to studying computational processes within the growing field of digital rhetoric While computational code is often seen as value neutral and mechanical this volume explores the underlying and often unexamined modes of persuasion this code engages In so doing it argues that computation is in fact rife with the values of those who create it and thus has powerful ethical and moral implications From Socrates's critique of writing in Plato's Phaedrus to emerging new media and internet culture the scholars assembled here provide insight into how computation and rhetoric work together to produce social and cultural effects This multidisciplinary volume features contributions from scholar practitioners across the fields of rhetoric computer science and writing studies It is divided into four main sections Emergent Machines examines how technologies and algorithms are framed and entangled in rhetorical processes Operational Codes explores how computational processes are used to achieve rhetorical ends Ethical Decisions and Moral Protocols considers the ethical implications involved in designing software and that software's impact on computational culture and the final section includes two scholars' responses to the preceding chapters Three of the sections are prefaced by brief conversations with chatbots autonomous computational agents addressing some of the primary questions raised in each section At the heart of these essays is a call for emerging and established scholars in a vast array of fields to reach interdisciplinary understandings of human machine interactions This innovative work will be valuable to scholars and students in a variety of disciplines including but not limited to rhetoric computer science writing studies and the digital humanities

Designing for Democracy Jennifer Forestal,2022 How should we fix digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a

The Whole Works of the Reverend Mr. John Flavel ... To which are Added, Alphabetical Tables of the Texts of Scripture Explained; and Indexes of Principal Matters Contained in the Whole John Flavel, 1740 **Building Brand Communities** Carrie Melissa Jones, Charles Vogl, 2020-06-09 An authentic brand community is more than just people buying your product or working alongside one another. This book articulates the critical roles of mutual concern, common values, and shared experiences in creating fiercely loyal customer and collaborator relationships. Smart organizations know that creating communities is the key to unlocking unprecedented outcomes. But too many mistakenly rely on superficial transactional relationships as a foundation for community when really people want something deeper. Carrie Melissa Jones and Charles Vogl argue that in an authentic and enriching community members have mutual concern for one another, share personal values, and join together in meaningful shared experiences, whether online or off. On the deepest level, brands must help members grow into who they want to be. Jones and Vogl present practices used by global brands like Yelp, Etsy, Twitch, Harley Davidson, Salesforce, Airbnb, Sephora, and others to connect in a meaningful way with the people critical for their success. They articulate how authentic communities can serve organizational goals in seven different areas: innovation, talent recruitment, customer retention, marketing, customer service, building transformational movements, and creating community forums. They also reveal principles to grow a new brand community to critical mass. This is the first comprehensive guide to a crucial differentiator that gives organizations access to untapped enthusiasm and engagement. **Der Römischen Keyserlichen, auch zu Hungern und Böhmen Königlicher Mayestat, weilandt Matthiae, hochlöblichsten Andenckens, und Ferdinandi II. jetzo regierenden Römischen Keyzers, und deß heiligen Römischen Reichs, Geistlicher und Weltlicher Chur und Fürsten und anderer Reichsständ Acta publica**, 1624 **Baronia Anglica** Thomas Madox, 1736 **Complex Networks and Their Applications XI** Hocine Cherifi, Rosario Nunzio Mantegna, Luis M. It presents the peer-reviewed proceedings of the XI International Conference on Complex Networks and their Applications, COMPLEX NETWORKS 2022. The carefully selected papers cover a wide range of theoretical topics, such as network models and measures, community structure, network dynamics, diffusion, epidemics, and spreading processes, resilience, and control, as well as all the main network applications, including social and political networks, networks in finance and economics, biological and neuroscience networks, and technological networks. **Journal of the British Archaeological Association** British Archaeological Association, 1879 *Gaming Democracy* Adrienne L.

Massanari,2024-10-15 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In *Gaming Democracy* Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley s emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming *Gaming Democracy* is a novel contribution to our understanding of online platforms and far right political activism

Rigged Mollie Hemingway,2021-10-12 FROM THE AUTHOR OF THE 1 NATIONAL BESTSELLER JUSTICE ON TRIAL Stunned by the turbulence of the 2020 election millions of Americans are asking the forbidden question what really happened It was a devastating triple punch Capping their four year campaign to destroy the Trump presidency the media portrayed a Democratic victory as necessary and inevitable Big Tech wielding unprecedented powers vaporized dissent and erased damning reports about the Biden family s corruption And Democratic operatives exploiting a public health crisis shamelessly manipulated the voting process itself Silenced and subjected the American people lost their faith in the system RIGGED is the definitive account of the 2020 election Based on Mollie Hemingway s exclusive interviews with campaign officials reporters Supreme Court justices and President Trump himself it exposes the fraud and cynicism behind the Democrats historic power grab Rewriting history is a specialty of the radical left now in control of America s political and cultural heights But they will have to contend with the determination insight and eloquence of Mollie Hemingway RIGGED is a reminder for weary patriots that truth is still the most powerful weapon The stakes for our democracy have never been higher
