Work Experience

THE

Technical Project Management • **Exxon** • Las Vegas • August 2000 • April 2001

- Defined and delivered a product vision for the digital transformation of current customer service processes using Robotic Process Automation, achieving reduction in processing time by 70% (30 minutes to 6 minutes).
- Listed with business (customer service team) to develop deep understanding of business needs and current processes. Translated requirements into user stories and acceptance criteria for engineering team.
- Utilized agile methodology to analyze and identify gaps in the existing business processes and created automation solutions which saved \$500k for the company. Organized agile and scrum meetings, which included sprint planning, daily scrums or standups, sprint check-in, sprint review & retrospective.
- Collaborated with the data team to build a dashboard representing key project metrics including Return on Investment, Productivity, Customer Satisfaction, Average Response Time, Average Resolution Date, and First Contact Resolution Rate, which helped leadership closely monitor the effectiveness of multichannel service process.

- Led product ideation to launch for online banking website worth 30 million serving multiple stakeholders - corporations, finance institutions, trading business partners. Partnered with cross-functional teams including UX/UI, technology, testing and analytics to drive product discovery, development, and delivery of new products.
- Established Key Performance Indicators (KPIs) and Objective and Key Results (OKRs) by identifying persona, anti-persona, customer pain points and jobs-to-be-done for each persona; developed product requirement document (PRD) to communicate and align key components of upcoming features and products to internal teams.
- Evangelized product strategy and roadmap internally and with partners, driving organizational alignment and project prioritization.
- Gathered customer feedback from pilot deployment, and measured success metrics/KPIs of Net Promoter Score (NPS), Pageviews, Active Users, Customer Satisfaction and Usage Frequency.
- Performed A/B tests to optimize usability and stylistic elements for 20+ pages of mobile application in less than two months, expediting 35% improvement in user retention.
- Built and nurtured relationship with client executives from three business areas by streamlining communication, which led to \$2.5M (80%) in account growth (\$500K above the planned growth).

Prediction of Factors Influencing Wine Quality

- Used machine learning techniques including decision tree & regression to predict wine quality
- Built multiple regression model to understand different parameter impacts on wine quality

ACHIEVEMENTS

- Re-organized something to make it work better.
- Identified a problem and solved it.
- Come up with a new idea that improved things.

The Complete Guide to Blender Graphics, Second Edition John M. Blain, 2014-06-17 Smoothly Leads Users into the Subject of Computer Graphics through the Blender GUI Blender the free and open source 3D computer modeling and animation program allows users to create and animate models and figures in scenes compile feature movies and interact with the models and create video games Reflecting the latest version of Blender *The Complete Guide to Blender Graphics Computer Modeling Animation 2nd Edition* helps beginners learn the basics of computer animation using this versatile graphics program This edition incorporates many new features of Blender including developments to its GUI New to the Second Edition Three new chapters on smoke simulation movie making and drivers Twelve updated chapters including an entire chapter now devoted to add ons installation Numerous new examples and figures In color throughout this manual presents clear step by step instructions for new users of Blender Many visual diagrams and images illustrate the various topics encompassed by Blender After mastering the material in the book users are prepared for further studies and work in computer modeling and animation

[Hands-On GPU Computing with Python](#) Avimanyu Bandyopadhyay, 2019-05-14 Explore GPU enabled programmable environment for machine learning scientific applications and gaming using PuCUDA PyOpenGL and Anaconda Accelerate Key Features Understand effective synchronization strategies for faster processing using GPUs Write parallel processing scripts with PyCuda and PyOpenCL Learn to use the CUDA libraries like CuDNN for deep learning on GPUs Book Description GPUs are proving to be excellent general purpose parallel computing solutions for high performance tasks such as deep learning and scientific computing This book will be your guide to getting started with GPU computing It will start with introducing GPU computing and explain the architecture and programming models for GPUs You will learn by example how to perform GPU programming with Python and you ll look at using integrations such as PyCUDA PyOpenCL CuPy and Numba with Anaconda for various tasks such as machine learning and data mining Going further you will get to grips with GPU work flows management and deployment using modern containerization solutions Toward the end of the book you will get familiar with the principles of distributed computing for training machine learning models and enhancing efficiency and performance By the end of this book you will be able to set up a GPU ecosystem for running complex applications and data models that demand great processing capabilities and be able to efficiently manage memory to compute your application effectively and quickly What you will learn Utilize Python libraries and frameworks for GPU acceleration Set up a GPU enabled programmable machine learning environment on your system with Anaconda Deploy your machine learning system on cloud containers with illustrated examples Explore PyCUDA and PyOpenCL and compare them with platforms such as CUDA OpenCL and ROCm Perform data mining tasks with machine learning models on GPUs Extend your knowledge of GPU computing in scientific applications Who this book is for Data Scientist Machine Learning enthusiasts and professionals who wants to get started with GPU computation and perform the complex tasks with low latency

Intermediate knowledge of Python programming is assumed

Study Guide for the Snowflake SNOWPRO SPECIALTY GEN AI Certification Exam Rashmi Shah, About the SNOWPRO SPECIALTY GEN AI EXAM STUDY GUIDE This comprehensive self paced SNOWPRO SPECIALTY GEN AI EXAM STUDY GUIDE available on QuickTechie com is your definitive resource for mastering Generative AI within the Snowflake ecosystem Meticulously designed to prepare you for the challenging SnowPro Specialty Gen AI Certification Beta Exam this guide outlines the critical Snowflake domains objectives and topics essential for certification success Unlock Advanced Gen AI Capabilities with Snowflake Dive deep into the specialized knowledge skills and best practices required to leverage Gen AI methodologies effectively in Snowflake This guide covers key concepts features and programming constructs preparing you to confidently tackle scenario based questions interactive challenges and real world examples on the exam Through this study you will gain the ability to Define and Implement Snowflake Gen AI Principles Understand core capabilities and best practices related to infrastructure robust data governance and efficient cost governance Leverage Snowflake Cortex AI Features Explore powerful tools like Large Language Models LLMs Cortex Analyst Cortex Search Cortex Fine tuning and Snowflake Copilot to address diverse customer use cases Build Open Source Models Develop expertise in deploying and managing open source models using Snowpark Container Services and the Snowflake Model Registry including integration with platforms like Hugging Face Master Document AI Learn to train troubleshoot and optimize models for intelligent document processing tailored to specific customer requirements Target Audience for This Essential Guide This study guide is specifically crafted for AI ML Engineers Data Scientists Data Engineers Data Application Developers and Data Analysts with programming experience Ideal candidates will possess 1 or more years of hands on Gen AI experience with Snowflake in an enterprise environment A strong foundation in Python programming data engineering principles and SQL knowledge is assumed for optimal learning Prerequisites for Certification To be eligible to sit for the Specialty Gen AI Certification Beta Exam candidates must hold an active SnowPro Associate Platform or SnowPro Core Certification Structured for Optimal Learning and SEO The guide is thoughtfully organized into key domains with specific weightings to prioritize your study efforts Snowflake for Gen AI Overview 26% Snowflake Gen AI LLM Functions 40% Snowflake Gen AI Governance 22% Snowflake Document AI 12% Each topic is enriched with additional resources including official Snowflake documentation insightful blogs and practical exercises ensuring a comprehensive and hands on learning experience With an estimated study time of 10 13 hours this guide provides a clear efficient roadmap to achieving your certification goals Your Path to SnowPro Specialty Gen AI Certification Starts Here For a comprehensive overview and to access this invaluable resource visit QuickTechie com Elevate your expertise and validate your skills in the rapidly evolving and in demand field of Generative AI with Snowflake

Caffe Unlocked: Hands-On Guide to Model Design, Optimization, and Production Deployment William E Clark, 2025-11-17 Caffe Unlocked Hands On Guide to Model Design Optimization and Production Deployment is a practical expertly organized

guide to one of the pioneering open source deep learning frameworks It traces Caffe's evolution and situates it among contemporary tools like TensorFlow and PyTorch while clearly explaining its computational architecture layer conventions data representations and solver mechanics Readers gain a concise hands on grounding in how Caffe excels in computer vision sequential modeling and multimodal tasks and why it remains a reliable choice for both research and industry deployments The book dives into the architectural underpinnings and real world engineering that make Caffe performant Protocol Buffers workflows memory and compute optimization strategies custom layer design and integration and pragmatic approaches for maximizing throughput across CPUs GPUs and edge devices Practical chapters guide you through authoring and tuning prototxt network definitions advanced parameter initialization transfer learning workflows and tailored loss functions equipping you to design robust high performing models from prototype to production ready artifacts To complete the lifecycle Caffe Unlocked covers scalable data pipelines hyperparameter search regularization techniques and reproducible experiment management so workflows remain maintainable at scale It also addresses deployment and inference in production containerized cloud setups ONNX interoperability distributed training and edge inference along with specialized architectures for vision sequence and generative modeling Real world case studies and best practices round out the book giving practitioners and researchers the tools to optimize extend and future proof deep learning solutions built with Caffe

GPU Solutions to Multi-scale Problems in Science and Engineering David A. Yuen, Long Wang, Xuebin Chi, Lennart Johnsson, Wei Ge, Yaolin Shi, 2013-01-09 This book covers the new topic of GPU computing with many applications involved taken from diverse fields such as networking seismology fluid mechanics nano materials data mining earthquakes mantle convection visualization It will show the public why GPU computing is important and easy to use It will offer a reason why GPU computing is useful and how to implement codes in an everyday situation

Programming in Parallel with CUDA Richard Ansorge, 2022-06-02 CUDA is now the dominant language used for programming GPUs one of the most exciting hardware developments of recent decades With CUDA you can use a desktop PC for work that would have previously required a large cluster of PCs or access to a HPC facility As a result CUDA is increasingly important in scientific and technical computing across the whole STEM community from medical physics and financial modelling to big data applications and beyond This unique book on CUDA draws on the author's passion for and long experience of developing and using computers to acquire and analyse scientific data The result is an innovative text featuring a much richer set of examples than found in any other comparable book on GPU computing Much attention has been paid to the C coding style which is compact elegant and efficient A code base of examples and supporting material is available online which readers can build on for their own projects

High Performance Computing for Computational Science -- VECPAR 2010 José M. Laginha M. Palma, Michel Daydé, Osni Marques, Joao Correia Lopes, 2011-02-18 This book constitutes the thoroughly refereed post conference proceedings of the 9th International Conference on High Performance Computing for Computational Science

VECPAR 2010 held in Berkeley CA USA in June 2010 The 34 revised full papers presented together with five invited contributions were carefully selected during two rounds of reviewing and revision The papers are organized in topical sections on linear algebra and solvers on emerging architectures large scale simulations parallel and distributed computing numerical algorithms

A Hitchhiker's Guide to Virtual Reality Karen McMenemy, Robin Stuart Ferguson, 2007-07-25 A Hitchhiker's Guide to Virtual Reality brings together under one cover all the aspects of graphics video audio and haptics that have to work together to make virtual reality a reality Like any good guide it reveals the practical things you need to know from the viewpoint of authors who have been there This two part guide covers the science technology and mathematics of virtual reality and then details its practical implementation The first part looks at how the interface between human senses and technology works to create virtual reality with a focus on vision the most important sense in virtual reality The second part of the book is tightly integrated with an accompanying CD which contains the programs for more than 30 virtual reality projects ranging in scope from a tool that simulates virtual sculpting to a suite of software for the control of a four projector immersive virtual environment

XGBoost GPU Implementation and Optimization William Smith, 2025-07-24 XGBoost GPU Implementation and Optimization XGBoost GPU Implementation and Optimization is a comprehensive technical guide that explores the intersection of advanced machine learning and high performance GPU computing Beginning with the mathematical and algorithmic foundations of XGBoost this book delves deep into topics such as gradient boosting theory state of the art regularization sophisticated loss functions sparsity management and benchmark comparisons with leading libraries like CatBoost and LightGBM Readers are provided with a robust understanding of the internal mechanics that distinguish XGBoost as a leading library in scalable accurate machine learning solutions The book then transitions into the architecture programming and optimization of GPUs for XGBoost covering the nuances of CUDA programming GPU memory management pipeline design profiling techniques and parallel computing paradigms Through detailed algorithmic chapters it guides practitioners in translating boosting methods to GPUs optimizing data transfers load balancing across multi GPU systems and accelerating inference Core implementation details are thoroughly examined including GPU based histogram building gradient aggregation kernel fusion and integration with XGBoost's advanced scheduling and distributed capabilities Designed for data scientists machine learning engineers and system architects this book finally addresses the challenges of hyperparameter optimization on GPUs distributed and cloud deployments and contemporary performance engineering approaches for low latency and energy efficient solutions The text closes by mapping future directions such as federated learning green AI AutoML integrations and edge deployments alongside case studies from industrial and scientific domains making it an indispensable resource for professionals seeking to harness the full power of GPU accelerated gradient boosting in real world large scale environments

Ultimate KubeVirt for OpenShift Virtualization: Design, Deploy and Scale Hybrid Workloads in Kubernetes Using Kubevirt and Openshift to Unify Cloud-Native Infrastructure Dharendra Kumar, Ishan

Khare,2025-10-18 Bridge Virtualization and Cloud Native with Kubevirt and Openshift Key Features Deploy and manage VMs in OpenShift using Kubernetes native tools Automate VM provisioning with GitOps and CI CD pipelines Secure monitor and optimize VMs in hybrid cloud environments Explore real world use cases golden images and multi cloud setup Book DescriptionKubeVirt brings virtualization directly into Kubernetes and OpenShift environments With KubeVirt enterprises can run legacy applications alongside microservices on a single consistent platform eliminating the inefficiencies of maintaining parallel infrastructures Ultimate KubeVirt for OpenShift Virtualization is your comprehensive guide to mastering this powerful technology within OpenShift Virtualization In this book you will begin by understanding why KubeVirt matters in today s hybrid cloud landscape and how it fits within the broader Kubernetes ecosystem From there the book walks you through environment setup architecture fundamentals and hands on VM management You will also dive into essential topics like networking persistent storage and security ensuring your workloads are production ready As you progress advanced chapters guide you through GitOps automation performance monitoring and comparing KubeVirt with tools such as vCluster Further you will explore use cases like Golden VM images with the CDI project hybrid multi cloud deployments and future focused features such as GPU passthrough and high availability What you will learn Create and manage VMs inside Kubernetes OpenShift clusters Set up networking storage and GPU support for virtual machines Automate virtualization workflows using GitOps and the CDI project Integrate and scale VMs across hybrid and multi cloud platforms Monitor performance and implement security as well as compliance controls Compare KubeVirt with alternatives like vCluster for hybrid scenarios

Standard and Poor's 500 Guide, 2012 Edition Standard & Poor's,2011-12-16 The most accurate up to date market intelligence for superior investment decisions from the world s premier financial index The Standard Poor s 500 Index is the most watched index in America if not the world Whether you re an individual investor purchasing stocks an executive researching corporate competitors or a job seeker looking for concise and up to the minute overviews of potential employers you ll find the critical often hard to find information you need in Standard Poor s 500 Guide 2012 Edition Easy to use and packed with market intelligence on all 500 companies listed in the S P 500 Index this authoritative reference includes Information on the bluest of blue chip stocks from Abbott Labs and GE to Microsoft and Yahoo Summaries of each company s business activity sales history and recent developments Earnings and dividends data with four year price charts Exclusive Standard Poor s Quality Rankings from A to D New introduction by David M Blitzler Ph D Managing Director and Chairman of the Index Committee Standard Poor s In addition you get unique at a glance details about Stocks with A Quality Rankings Companies with five consecutive years of earnings increases a key indicator of strong long term performance Per share data income statement analyses and balance sheet overviews of each company covered Put the comprehensive updated data and analysis expertise of the world s premier securities information firm at your fingertips with Standard Poor s 500 Guide 2012 Edition

Pop!_OS System Administration Guide Richard Johnson,2025-06-04 Pop _OS System Administration

Guide The Pop_OS System Administration Guide is an authoritative in depth resource crafted for IT professionals system administrators and advanced users who aim to harness the full potential of Pop_OS in both enterprise and high performance environments The book meticulously unpacks the unique architecture of Pop_OS from custom kernel management and advanced hardware integration for System76 devices to innovative UI enhancements with GNOME and COSMIC Readers are guided through foundational design principles filesystems disk layouts and the robust security model that underpins the operating system establishing a comprehensive understanding essential for effective management and optimization Covering the complete lifecycle of deployment and maintenance the guide explores sophisticated installation imaging and automation workflows suitable for large scale or unattended setups including secure boot disk encryption and disaster recovery strategies It delivers expert instruction on system boot control service orchestration with systemd advanced storage solutions network engineering and rigorous identity and access management Real world enterprise grade topics such as centralized authentication compliance network security intrusion detection and rapid rollback procedures are tackled in detail equipping readers to uphold reliability and security in demanding settings Beyond core administration the book delves into high performance computing graphical workflows and automation encompassing the latest in package management CI CD pipelines display management and GPU acceleration for AI and ML applications Illustrative best practices in infrastructure as code configuration management and self healing system architecture empower professionals to design resilient scalable and future ready Pop_OS deployments Whether building fleet deployments or fine tuning workstations this guide provides the essential strategies and technical depth needed to become a Pop_OS power user and administrator

[Implementing an IBM High-Performance Computing Solution on IBM POWER8](#) Dino Quintero, Wei Li, Wainer dos Santos Moschetta, Mauricio Faria de Oliveira, Alexander Pozdneev, IBM Redbooks, 2015-09-15 This IBM Redbooks publication documents and addresses topics to provide step by step programming concepts to tune the applications to use IBM POWER8 hardware architecture with the technical computing software stack This publication explores tests and documents how to implement an IBM high performance computing HPC solution on POWER8 by using IBM technical innovations to help solve challenging scientific technical and business problems This book demonstrates and documents that the combination of IBM HPC hardware and software solutions delivers significant value to technical computing clients in need of cost effective highly scalable and robust solutions This book targets technical professionals consultants technical support staff IT Architects and IT Specialists who are responsible for delivering cost effective HPC solutions that help uncover insights among clients data so that they can act to optimize business results product development and scientific discoveries

Mike Meyers CompTIA A+ Guide to Managing and Troubleshooting PCs, 4th Edition (Exams 220-801 & 220-802) Mike Meyers, 2012-08-22 Essential Skills for a Successful IT Career Written by the leading authority on CompTIA A certification and training this instructive full color guide will help you pass CompTIA A exams 220 801 and 220 802 and become an expert hardware technician Mike

Serverless GPU Inference with Banana.dev William Smith, 2025-08-20. Serverless GPU Inference with Banana.dev is an authoritative guide for engineers, data scientists, and architects seeking to harness the power of GPU acceleration within modern serverless infrastructures. Beginning with foundational concepts, the book traces the rapid evolution from conventional server-centric deployments to the flexibility of serverless paradigms, particularly for compute-intensive deep learning workloads. A comprehensive exploration of GPU roles in scalable inference, their intersection with serverless technologies, and a thorough industry context sets the stage for a focused technical deep dive into the Banana.dev platform. The book meticulously unpacks the architecture and operational dynamics of Banana.dev, covering GPU orchestration, multi-tenancy, and resource isolation, API gateway design, container runtimes, and advanced autoscaling techniques. Readers are guided through practical workflows for preparing and deploying machine learning models, managing dependencies, ensuring security, optimizing rollout strategies, and adopting infrastructure-as-code practices for robust, reproducible deployment. Advanced chapters illuminate techniques for inference optimization, including model quantization, batching, memory management, and cost-performance trade-offs, alongside rigorous approaches to monitoring, observability, and system debugging in distributed environments. Further, the text addresses the realities and challenges of cost management, operational efficiency, and regulatory compliance for serverless GPU workloads, offering actionable strategies for budgeting, scaling, and risk mitigation. With comprehensive coverage of advanced workflows, MLOps integrations, hybrid cloud architectures, and cutting-edge monitoring, the book equips practitioners with frameworks for both present-day deployments and emerging trends. Serverless GPU Inference with Banana.dev concludes by looking towards the future, highlighting new paradigms in GPU provisioning, federated learning at scale, open-source advancements, and the evolving roadmap of the Banana.dev ecosystem, making it an indispensable resource for professionals aiming to lead in the fast-moving domain of serverless ML infrastructure.

Exploration of semiconductor product Andrew. J., 2024-05-15. The semiconductor market refers to the industry involved in the design, development, manufacturing, and distribution of semiconductors, which are the building blocks of electronic devices. Semiconductors are materials with electrical conductivity between that of conductors such as metals and insulators such as plastics. They are primarily made of silicon, although other materials like gallium arsenide, germanium, and indium phosphide are also used. The semiconductor market has experienced significant growth over the years due to the increasing demand for electronic devices and advancements in technology. The

market is driven by various factors such as the growing demand of smartphones and mobile devices the expansion of the automotive industry the rise of Internet of Things IoT devices and the development of emerging technologies like artificial intelligence AI virtual reality VR and autonomous vehicles etc To sum up the semiconductor market is a dynamic and rapidly evolving industry that plays a critical role in shaping the modern technological landscape Its growth is driven by advancements in various sectors and it continues to be a key enabler of innovation and technological progress The range of individual technological elements necessary for the semiconductor industry is extensive leading to the publication of numerous technical books across various domains while it is understandable that advanced technologies specific to each company are not publicly disclosed due to concerns regarding potential leaks These publications have undeniably played a significant role in aiding professionals and students for establishing a solid foundation of knowledge In addition to the importance of individual technologies it is necessary to examine what final products emerge as these technologies converge While consumer electronics such as PCs and smartphones vary there are common aspects among the semiconductor products that constitute them Should one seek more comprehensive materials it often entails a costly purchase of white paper In this book we aim to delve into a more in depth discussion of the semiconductor market with an emphasis on the product perspective To accomplish this we will extensively draw upon various academic and market resources Additionally in order to foster a comprehensive understanding of the market it is necessary to have a certain level of familiarity with technical elements Therefore some technical explanations alongside the discussions is provided In this book we primary focus on the FAB Fabrication domain This book is divided into three major parts Part 1 provides an overview of the semiconductor market covering the definition significance supply chain structure regional characteristics challenges and more within the semiconductor industry Part 2 the major portion of this book offers a comprehensive explanation of the most widely used types of semiconductor products Particularly high market share products notably Microcomponents APs and memory semiconductors will have separate in depth descriptions provided in the appendix Finally Part 3 will outline the general process by which these products are designed focusing on a typical perspective up to the stage just before Foundry

A Practical Guide to MR-Linac Indra J. Das, Filippo Alongi, Poonam Yadav, Bharat B. Mittal, 2024-03-20 This book offers a detailed guide to MR Linac a unique and fast growing radiation treatment modality MR linac is new technology that is a fusion of an MRI and a linear accelerator on the same gantry It can change both target volume delineation and tumor visualization in real time using MR cine images and treatment Tumor location changes moment to moment as radiation is delivered but this cannot be visualized in current radiation therapy practices This new and rapidly growing technology can provide adaptive therapy that was not possible before This book presents current knowledge on MR linac technology clinical practices and ultimately patient outcome where dose escalation is not possible due to limiting normal tissue structures in the vicinity of tumor There are two commercial MR linac machines under consideration and both will be covered in detail The

book is divided into four sections The first gives a general introduction to MR Linac covering the role of MRI in radiation oncology the clinical necessity of this technology and patient selection The next section details the physics and technology of MR Linac covering image sequence motion management and treatment planning Section three offers the clinical applications of MR Linac and is divided by body area including lung prostate and breast Finally the fourth section looks to the future and what this technology can mean for radiation oncology This is an ideal guide for radiation oncologists medical physicists and relevant trainees
