A Library of the World's Best Literature, Ancient and Modern: Synopses of books. General index Charles Dudley Warner, Hamilton Wright Mabie, Charles Henry Warner, Lucia Isabella Gilbert Runkle, 1897 *A Library of the World's Best Literature - Ancient and Modern - Vol. XLV (Forty-Five Volumes); Synopses of Famous Books & General Index* Charles Dudley Warner, 2009-01-01

It would be enough to recommend this astonishing 45 volume set first published in 1896 if it were merely a wonderfully massive compilation of the world's best writings from the world's best authors up until the advent of the 20th century. But A Library of the World's Best Literature is so much more than that. For this marvelous collection represents the evolution of human thought, the evolution of human civilization even as seen through the mind of one of the most important if sadly almost forgotten literary figures of the 19th century. Popular American essayist, novelist, and journalist CHARLES DUDLEY WARNER (1829-1900) was renowned for the warmth and intimacy of his writing which encompassed travelogue, biography, and autobiography, fiction, and more, and influenced entire generations of his fellow writers. Here the prolific writer turned editor for his final grand work, a splendid survey of global literature, classic and modern, and it's not too much to suggest that if his friend and colleague Mark Twain who stole Warner's quip about how everybody complains about the weather but nobody does anything about it had assembled this set, it would still be hailed today as one of the great achievements of the book world. And so it still deserves to be arranged not chronologically but alphabetically, mostly under the names of authors, but in some cases of literatures or special subjects such as Icelandic literature or Arthurian legend. This set is no dry reference work. These eminently browsable volumes, available through Cosimo for the first time in decades in both paperback and hardcover editions, are meant to be read and enjoyed by anyone who loves the written word. Volume 45 features more synopses of notable works from Adam Bede by George Eliot to Zury The Meanest Man in Spring County by Joseph Kirkland, including many not previously referenced in the set but highlighted as well worth a serious reader's time and attention. This volume also includes a General Index to the 45 volume set.

Biohackers Magazine Issue 11 Biohackers, The world and the humans share a special bond together. The world is a place full of vibrant life, unpredictable events, and a sort of beautiful self-sustaining chaos. The human being's journey on this Earth is one that is corporeal yet also deeply spiritual. The world presents so many things into our lives that often we forget that we are more than just what invokes responses from our physical senses. What separates man from every other creature is his ability to think rationally. What man lacks in survival endowments such as long claws, fur, etc., man makes up for in his ability to know. Man can think and know that he thinks. Man can eat and know that he eats. Man can speak and know that he speaks. The human being is able to conquer and have dominion over the creatures and the world itself because of this unique ability to know rationally. There are many different areas where the human being shows this separation of pure intellect. One would be his tool-making ability or homo faber. It is

true that some monkeys can make tools but it is the only man that makes these tools not just as an extension of their bodily reach but as direct fruition of their thoughts Community Language Science Arts Religion Death and Culture are all elements that show man's rationality his intellect The intellect exists in the soul of man and animates the body through the influence on man's free will Too often we focus on the superficial parts of ourselves and get lost in the mainstream's constant influential assault about how we should be physical While of course we are composed of the body we must remember that it is the soul that also makes up our life and its health must also be taken into consideration in everything we do We can define a human being as a rational animal a composite of both body and soul Its soul is the subsistent element and its powers involve the knowing intellect and the will to do good With free will aiming toward good and knowledge aiming towards the truth the human being works towards becoming more beautiful in the sense of intentionality of culture Biohacking in its deepest sense must look beyond the temporal world of physiological and temporal matter and adhere to the health and the growth of the human soul We are all on this Earth together and as biohackers we have the mission of increasing our knowledge every single day to feed not only our bodies and brains but most importantly our souls When one chooses to take the time to explore such questions as who they are and how they act and where they are going and what is their purpose they increase their value as a person through this continual development Their soul becomes more of a master over their temporal body and they can live life with perhaps more peace and happiness because of their continued growth and development of their soul which acts through their body
