Netflixed Gina Keating,2012-10-11 Netflix has come a long way since 1997 when two Silicon Valley entrepreneurs Marc Ran dolph and Reed Hastings decided to start an online DVD store before most people owned a DVD player They were surprised and elated when launch day traffic in April 1998 crashed their server and resulted in 150 sales Today Netflix has more than 25 million subscribers and annual revenues above 3 billion Yet long term success or even survival is still far from guaranteed Journalist Gina Keating recounts the absorbing fast paced drama of the company s turbulent rise to the top and its attempt to invent two new kinds of business First it engaged in a grueling war against video store behemoth Blockbuster transforming movie rental forever Then it jumped into an even bigger battle for online video streaming against Google Hulu Amazon and the big cable companies Netflix ushered in such innovations as DVD rental by mail a patented online queue of upcom ing rentals and a

recommendation algorithm called Cinematch that proved crucial in its struggle against bigger rivals Yet for all its success Netflix is still a polarizing company Hastings is often heralded as a visionary he was named Business Person of the Year in 2010 by Fortune even as he has been called the nation's worst CEO Netflix also faces disgruntled customers after price increases and other stumbles that could tarnish the brand forever The quest to become the world's portal for premium video on demand will determine nothing less than the future of entertainment and the Internet Drawing on extensive new interviews and her years covering Netflix as a financial and entertainment reporter Keating makes this tale as absorbing as it is important

Look Who's Watching. Revised Edition Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue trust To

meet its full potential users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking while also being secure private and safe When trust in the Internet wanes the network's stock of digital social capital falls and users begin to alter their online behaviour These often subtle changes in behaviour tend to be collectively highly maladaptive hindering the economic developmental and innovative potential of the globe spanning network of networks Look Who's Watching Surveillance Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users the proliferation of cybercrime and the growing commodification of user data and regulatory changes which threaten to fragment the system are all rapidly eroding the confidence users have in the Internet ecosystem Based on a combination of illustrative anecdotal evidence and analysis of new survey data Look Who's Watching clearly demonstrates why trust matters how it is being eroded and how with care and deliberate policy action the essential glue of the Internet can be restored
