Design of Effective Instagram Campaigns Carolin Wesche, 2020-04-28 Master's Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1.3 University of Münster Institute for Value Based Marketing language English abstract The following study investigates the influence of traditional design stimuli applied to a brand post on the consumer's engagement rate on Instagram Consumer engagement thereby represents the effectiveness of a brand post and is defined by the ratio of the number of likes of a brand post and the number of followers of the brand Aiming at analyzing the effectiveness of traditional design stimuli on Instagram the author gathers 450 Instagram brand posts from five different product categories which are subsequently assessed and coded The researcher then conducts a regression analysis as this allows to evaluate the influence of the traditional visual design stimuli on the consumer's engagement rate Whereas novel cognitive demanding stimuli are not found to influence the engagement rate for a brand post certain physically intensive prominent stimuli as well as some affective emotional stimuli have a significant influence The present study further investigates the moderating effect of brand knowledge on the magnitude of the stimuli's influence on consumer engagement rate The results indicate that brand knowledge has a moderating effect on certain stimuli For all other stimuli the influence on the engagement rate does not change for different levels of brand knowledge The results further show that design stimuli applied in brand posts on Instagram differ in their impact on the engagement rate depending on the product category shown in the brand post These findings can be used by managers to exploit the benefits of social media marketing on Instagram

appealing colours and filters of lively Instagram users that are interested in sport and leisure via an experiment For the experiment two groups were randomly chosen which were as similar as possible All participants had to be interested in sport leisure One group had to answer questions about original photos and the second group about edited photos 16 images were posted in original and edited at the Instagram profile Bachelor_Workout to see which photos receive more likes The outcome shows that participants prefer photos edited Approximately edited photos receive min 20 per cent more views and likes compared to original photos Furthermore participants like warm colours filters such as Hefe and Valencia and the colourful filter Clarendon Especially men do like the black and white filter Moon compared to women who prefer the filter X_Pro_II To engage Instagram users who are interested in sport and leisure 12s should edit photos with warm colours to reach the target group of the sport company S If they like to reach more men they can use the black and white filter Moon and if they concentrate more on women with a photo they should use the filter Rise Mind Over Media Renee Hobbs,2020-10-20 Winner of the AAP 2021 PROSE Award for Excellence in Social Sciences Propaganda is inescapable It s everywhere Students need to analyze resist critique and create Media literacy educators have always insisted that we are both creators and receivers of media messages The truth of this is even more apparent in today s digital environment with children and adults alike participating in a ubiquitous nonstop stream of social media Clearly students need the tools to interpret news and information critically not just for school but for life in a post truth world where the lines blur between entertainment information and persuasion Renee Hobbs demonstrates how a global perspective on contemporary propaganda enables educators to stimulate both the intellectual curiosity and the cultural sensitivities of students Replete with classroom and online learning activities and samples of student work Mind Over Media provides a state of the art look at the theory and practice of propaganda in contemporary society and shows how to build learners critical thinking and communication skills on topics including computational propaganda content marketing fake news and disinformation

Allein im Jahr 2017 wurden innerhalb von nur sechs Monaten 17 Millionen Instagram Businessprofile neu angelegt. Damit verzeichnet Instagram 25 Millionen Unternehmensprofile weltweit. Auch auf der Nutzerseite ist ein Anstieg zu verzeichnen. Laut Statistiken folgen circa 80 Prozent der Nutzer einem Unternehmen auf Instagram. Doch wieso ist dies so?
