Return Migration Decisions Ruth Achenbach, 2016-10-21 Ruth Achenbach develops a model of individual return migration decision making which examines both the process and the decisive factors in return migration decision making of Chinese highly skilled workers and students in Japan She proposes to answer a question yet insufficiently explained by migration research why do migrants deviate from their migration intentions and return sooner or later than planned or not at all Her study integrates factors from the spheres of career family and lifestyle and redefines stages in long term decision making processes thereby contributing to decision and migration theory She analyzes migrants shifting priorities over the course of migration including a perspective on life course and on the impact of the triple catastrophe of March 11 2011

Mobilities in Remote Places Phillip Vannini, 2023-07-21 *Mobilities in Remote Places* explores the meanings challenges and opportunities of remoteness as practiced and experienced by those who live and work in some of the world's most remote communities As mobilities around the world proliferate in countless forms the meanings of remoteness undergo significant change Places once considered impossibly distant have appeared to become closer more accessible and less distinct from global centers of geopolitical power But instead of disappearing altogether configurations of remoteness evolve manifesting themselves through new possibilities new challenges and new insecurities Drawing from a variety of case studies from around the globe the contributors of the book examine remoteness as an outcome of evolving mobility constellations Rather than defining remoteness as an absolute or objective time distance condition the book shows how remoteness is a practice experience and representation that is situated relational and emergent This collection of original and thought provoking chapters will be of interest to students and researchers in the humanities and social sciences with an interest in mobilities place and human geography

Building Excellence in Higher Education Arnoud De Meyer, Jovina Ang, 2021-08-25 Over the last 30 years Singapore has developed a system of higher education that is the envy of many other countries and regions How has Singapore developed such a highly performing education system Was it planned Was it mere luck Written by Arnoud De Meyer who is widely regarded as one of the pre eminent management educators and leaders in higher education the book focuses on Singapore as an in depth case study of how to build a system of higher education and specifically a portfolio of highly differentiated and diversified universities He worked closely together with Jovina Ang during the preparation of the manuscript This book is unique because it showcases several case studies of the emerging system of higher education and it was written based on insights drawn from interviews with the key decision makers and actors in the system from the past 20 years including ministers and permanent secretaries of the Ministry of Education and presidents and chairmen of the six universities The success of this system can be attributed to several factors the clarity of purpose of the decision makers with clear targets in cohort participation rate commitment to significant funding for education and research discipline of an intelligent and well implemented governance system flexibility in adjusting plans and rapid and adaptive learning from overseas partners In the last few chapters the authors look at the future of the system and postulate how it should be adjusted to the changes in Singapore and the world This unique book on educational strategy would be of particular interest to educational specialists and policy makers in emerging countries who want to build a system of higher education policy makers in mature industrialised countries who are faced with the challenge of revamping their system of higher education strategists who are interested in dynamic capability building and philanthropists who want to use education as an equaliser of social status

Handbook of the Economics of Education ,2023-01-18 The Handbook of the Economics of Education describes the research frontier in key topical areas and sets the agenda for further work Modern

analysis in the economics of education has made tremendous strides in understanding fundamental issues related to the production of human capital and the impact of varying institutional features of education systems By bringing together some of the world's leading scholars this volume provides a unique view of scholarship in the area The international perspectives of the editors Hanushek at Stanford Machin at LSE and Woessmann at Munich leads to a volume with something for all researchers Topics range from the economics of early childhood education to inequality in society to cash transfers in developing countries Identification and evaluation of the state of the art Clear descriptions of the meaning of existing research and the most likely avenues for the future Insights into how policy interventions in education can help or hurt human capital outcomes

The Political Economy of Peacebuilding in Post-Dayton Bosnia Timothy Donais, 2005-06-21 A fresh examination of the political economy of the peacebuilding process in Bosnia Herzegovina in the aftermath of the country's 1992-95 war Little progress has been made in transforming the country's war shattered economy into a functioning market economy this new study explains the principal dynamics that have led to this and places Bosnia's economic transition process within the context of the country's broader post conflict peacebuilding process The central argument this book persuasively advances is that much of Bosnia's ongoing economic crisis and its current reform stalemate can be explained by exploring the interactions of an inappropriate international model of economic reform with the country's particular post conflict and post socialist political economy This book is essential for readers who wish to build an understanding of the region and assess its future prospects and hopes

Employment Relations and Global Governance Yvonne Rueckert, 2023-07-07 Globalisation has created many opportunities for economic development but it is also associated with rising income inequality and poverty International crises such as the international financial and economic crisis of 2008 and more recently the global health pandemic have led to a rise in unemployment and income losses for workers and a surge in the violation of workers rights At global level intergovernmental organisations including the World Bank and the IMF are influential actors and policy makers which promote the UN Sustainable Development Goals However the International Financial Institutions IFIs have been criticised for their internal political power imbalances and macroeconomic policy prescriptions based on neo liberal principles The Global Unions and their affiliates as well as the International Labour Organisation ILO regularly comment on the negative impact of the IFI's policies in regard to labour flexibilisation and the privatisation of public and social services In 2002 a formalised dialogue was established between the Global Unions and the IFIs which addresses labour social and environmental issues This dialogue takes place at three levels the country level the sector level and the headquarters level The ILO maintains its own dialogue with the IFIs but it also participates at the headquarters level dialogue between the Global Unions and the IFIs

Employment Relations and Global

Governance focuses on the headquarters level dialogue which can be considered as a strategic instrument that helps the Global Unions and their affiliates to exercise influence over the policies of the IFIs especially those policies which concern workers The book describes and analyses the development of the dialogue since its establishment with a particular focus on factors which promote and hinder the dialogue The book provides important insights into the real world functioning of the institutions of economic global governance and its broader impact on the world of work It is likely to be key reading for academics researchers and students studying global employment relations political economy and international organisations It will also be of interest to international and national trade unions non governmental organisations and policy makers
