Conference proceedings. New perspectives in science education 7th edition Pixel, 2018-03-19 *Life Science in Space: Experiments on Board the SJ-10 Recoverable Satellite* Enkui Duan, Mian Long, 2019-09-11 This book presents the life science experiments in a space microgravity environment conducted on board the SJ 10 recoverable satellite which was launched on April 6th 2016 and recovered on April 18th 2016 It covers 10 scientific projects in radiation biology gravitational biology and biotechnology that were selected from 100 proposals from various institutions in China and around the world Primarily exploring the rhythm of life in a space microgravity environment all of the experiments conducted on nine payloads of the SJ 10 satellite have never been previously conducted in the respective fields In addition the book provides extensive information on the mission s execution data collection and scientific outcomes *Data and computation modeling for scientific problem solving environments* , An Assessment of the Science Proposed for the Deep Underground Science and Engineering Laboratory (DUSEL) National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Ad Hoc Committee to Assess the Science Proposed for a Deep Underground Science and Engineering Laboratory (DUSEL), 2012-03-02 According to the big bang theory our Universe began in a state of unimaginably high energy and density contained in a space of subatomic dimensions At that time unlike today the fundamental forces of nature were presumably unified and the particles present were interacting at energies not attainable by present day accelerators Underground laboratories provide the conditions to investigate processes involving rare phenomena in matter and to detect the weak effects of highly elusive particles by replicating similar environments to those once harnessed during the earliest states of the Earth These laboratories now appear to be the gateway to understanding the physics of the grand unification of the forces of nature Built to shield extremely sensitive detectors from the noise of their surroundings and the signals associated with cosmic rays underground facilities have been established during the last 30 years at a number of sites worldwide To date the United States efforts to develop such facilities have been modest and consist primarily of small underground laboratories However the U S underground community has pushed for larger underground facilities on the scale of major laboratories in other countries An Assessment of the Deep Underground Science and Engineering Laboratory DUSEL addresses this matter by evaluating the major physics questions and experiments that could be explored with the proposed DUSEL Measuring the potential impact this assessment also examines the broader effects of the DUSEL in regards to education and public outreach and evaluates the need associated with developing U S programs similar to science programs in other regions of the world
