Walking Workout 2025:

Just Use Postgres! Denis Magda, 2025-12-30 You probably don't need a collection of specialty databases. Just use Postgres instead. Need a fast, reliable SQL-compliant RDBMS? Just use Postgres. Need to work with geospatial data? Just use Postgres. Handling semi- or non-structured documents? Just use Postgres. Generative AI embeddings? You've got it; just use Postgres. Written for software engineers and database pros, *Just Use Postgres* shows you how to get the most out of the powerful PostgreSQL database. In *Just Use Postgres*, you'll learn how to develop generative AI, geospatial, and time series applications. Everything from transactional RDBMS services to specialized workloads. Modern SQL, including window functions, CTEs, and JSON data. Implement full-text search, B-trees, GIN, HNSW, expression, and more Postgres extensions. Since its initial release in 1996, PostgreSQL (aka Postgres) has grown into the most popular and powerful full-featured open-source RDBMS available. *Just Use Postgres* takes a modern look at Postgres, exploring the database's most up-to-date features for AI, time series, full-text search, geospatial, and other application workloads. About the book: *Just Use Postgres* uses relevant, concrete examples to show you how to interact with Postgres as a software developer. Each chapter focuses on a different use case, including an eCommerce application, a music streaming service, and other interesting challenges. You'll explore the Postgres techniques, features, and capabilities you need to streamline each app's unique data management issues. From fundamental RDBMS features to an ecosystem of extensions for generative AI and more, you'll learn how to get the absolute best out of Postgres. About the reader: For software developers who know the basics of SQL and relational databases. About the author: Denis Magda is a software engineer who started his career at Sun Microsystems and Oracle working on the Java platform and leading one of the Java development teams. After mastering Java from the inside, he ventured into the world of Postgres and other databases where he has stayed ever since. Enhancing Physical Activity in Women Across the Lifespan: Evidence-based Insights into Quantification, Intervention, Outcomes, and Limitations

Bojan Masanovic, Dušan Stupar, Szabolcs Halasi, Catalina Casaru, Gonul Babayigit Irez, 2025-11-05 You can submit your manuscript through either *Frontiers in Sports and Active Living* or *Frontiers in Public Health*. Please select the journal that best aligns with the focus of your research when you click submit. While sport and physical activity research have predominantly focused on male subjects, it is imperative to prioritize studies on women's participation to build comprehensive knowledge in this domain. Understanding the unique physiological mechanisms, training loads, recovery patterns, and performance contexts specific to women will provide valuable insights for practitioners. Additionally, investigating the evolutionary basis of sex differences in sports interest and motivation can inform policy and program design. This Research Topic offers an opportunity to publish high-quality research centered on physical activity and exercise for women across various age groups, including children, adults, and older adults. We are particularly

interested in innovative intervention research in school settings community based programs or sports environments aimed at promoting women s physical activity and fitness levels Additionally studies exploring the impact of exercise on injury prevention and treatment are highly welcome All submissions will be peer reviewed by experts in the field ensuring the highest quality of research dissemination Topics of interest include but are not limited to Implementation and impact of physical activity interventions Continuous monitoring systems for physical activity across different age groups of women Individualized physical activity programs to meet specific needs Health promoting interventions and their effects Assessment of physical fitness as an indicator of health Evolutionary perspectives on sex differences in sports interest and motivation We invite original research systematic reviews case studies clinical trials and reviews addressing these themes to contribute to this critical and growing field
