Work That Body Jamie Hakim, 2019-10-16 *Work That Body* Male Bodies in Digital Culture explores the recent rise in different types of men using digital media to sexualise their bodies It argues that the male body has become a

key site in contemporary culture where neoliberalism's hegemony has been both secured and contested since 2008. It does this by looking at four different case studies: the celebrity male nude leak, the rise of young men sharing images of their muscular bodies on social media, RuPaul's Drag Race body transformational tutorial, and the rise of chemsex. It finds that on the one hand, digital media has enabled men to transform their bodies into tools of value creation in economic contexts where the historical means they have relied on to create value have diminished. On the other, it has also allowed them to use their bodies to form intimate collective bonds during a moment when competitive individualism continued to be the privileged mode of being in the world. It therefore offers a unique contribution not only to the field of digital cultural studies but also to the growing cultural studies literature attempting to map the historical contradictions of the austerity moment.

Storytelling to Accelerate Climate Solutions Emily Coren, Hua Wang, 2024-05-27. The climate is changing faster than our cultural practices are adapting to it. This Open Access volume, co-edited by Emily Coren, a science communicator, and Hua Wang, a communication scientist, presents a survey of the latest in agency-focused climate storytelling. Together, practitioners and scholars across different fields shared their knowledge, experience, and insight about how stories can be designed and told to engage, enable, and empower individuals and communities in climate communication and action. You will learn a wide range of narrative strategies and exemplary applications of climate storytelling in terms of professional practices, e.g., education, literature, journalism, popular media genres and formats, e.g., drama, comedy, fiction, media platforms, e.g., television, radio, mobile, and communication modalities, e.g., text, visual, audio, multisensory. Entertainment education has been proven over decades to be an effective tool for social and behavior change in the public health sphere and has not yet been applied at scale to the massive ongoing climate-related disasters that we need to solve now, fast. There is an urgent need to rapidly apply and adapt public engagement tools for climate communication to speed up our response times for climate change mitigation and adaptation. This book takes a snapshot of where climate storytelling is currently at, describes where it fits within a climate communication landscape, and supports the next steps of its development. It facilitates the creation of climate storytelling efficiently by sharing and amplifying what is working well and building collaborations between practitioners and researchers.
