The Future Of The Video Game Industry, How Advanced Technologies Can Revolutionize The Video Game Industry, And Why Esports Have Become Popular As A Type Of Spectator Sport In The 21st Century Dr. Harrison Sachs, 2020-06-26 This essay sheds light on the future of the video game industry explicates how advanced technologies can revolutionize the video game industry and demystifies why esports have become popular as a type of spectator sport in the 21st century The future of the video industry will not only be characterized by dynamism as it continues to metaphorically evolve but will also be eminently auspicious for competitors in the video game industry Technological advancements have profoundly changed the video game industry and have rendered it all the more technology driven by sophisticated technologies The video industry shows no signs of contracting anytime in the imminent future The future of the video game industry is apt to be more sublime than envisioned especially as technological advancements are made which can further revolutionize the behemoth video game industry In 2024 it is possible to play video games in an ultra high definition 4 000 pixels resolution In other words the future of the video game industry will not be solely limited to shovelware mobile games pervading the video game industry The global gaming market was valued at 151 550 000 000 in 2019 and is expected to reach a value of 256 970 000 000 by 2025 registering a compound annual growth rate of 9.17% over the forecast period of 2020-2025 Game developers across emerging economies are continually striving to enhance gamers' experience launching and rewriting codes for diverse console platforms such as PlayStation Xbox and Windows PC which are incorporated into one product provided to the gamers through the cloud platform The emergence of cloud gaming Gaming Market Growth and has helped to substantially drive growth in the video game market In the coming years cloud gaming mobile gaming PC gaming and console gaming are apt to become all the more prevalent as entertainment options among customers Recent advances in advanced cloud technology have turned the idea of cloud gaming into reality In cloud gaming the server where all the games are stored does all the computation work which includes game scene rendering game logic processing video encoding and video streaming Gaming Market Growth and The rising popularity of esports gaming live streams and gameplay videos have also contributed to the growth of the behemoth video game industry It stands to preponderantly reason that the future of the video game industry will not only allow the video game industry to reach an unprecedented size but will also attract more competitors to enter the sizable video game industry In the coming years similarly to video streaming subscription services such as Netflix and Hulu customers are apt to have more video game
