

Course: Critical Thinking, Philosophy 1010

Study Guide: Midterm (Covers Chapters 1-3)

◦ Week 1:

- Critical Thinking
 - **Critical Thinking** is the skill of being able to correctly evaluate arguments that are made by others and compose a good argument of your own
 - You must use good reasoning when you're trying to use critical thinking skills and be able to determine what reasonings are better than others
- Arguments
 - **Arguments** are attempts to provide reasons for thinking that a certain belief or view is true.
 - all arguments have two parts
 - The reasons
 - The belief that those reasoning's are intended to be supporting
 - **Premises** are the reasons of an argument
 - **Conclusions** are the beliefs being supported in an argument

Example: "Over the next three months, the temperature will rise, Georgia will have an increase in temperature and drought."

Conclusion

Premise

- **Statements**
 - **Statements** are sentences that make a claim which can either be true or false
 - Every argument has two statements and **both the premises and**

Example:

	Are these all statements?	
1.	Read the next chapter for homework.	(Instruction)
2.	Did you do the homework?	(Question)
3.	A dog is an animal.	(Statement)
4.	Georgia State University is a college.	(Statement)

- **Statements vs Sentences**
 - Not all sentences are statements. There is only one kind of sentence that is considered a statement, that is "declarative" (true or false)
 - **A single sentence can contain two or more statements, in some situations two or more sentences may only contain one statement**
- **Identifying Arguments**
