Microphysics of Clouds and Precipitation H.R. Pruppacher, J.D. Klett, 1996-12-31 Cloud physics has achieved such a voluminous literature over the past few decades that a significant quantitative study of the entire field would prove unwieldy. This book concentrates on one major aspect: cloud microphysics, which involves the processes that lead to the formation of individual cloud and precipitation particles. Common practice has shown that one may distinguish among the following additional major aspects: cloud dynamics, which is concerned with the physics responsible for the macroscopic features of clouds; cloud electricity, which deals with the electrical structure of clouds and the electrification processes of cloud and precipitation particles; and cloud optics and radar meteorology, which describe the effects of electromagnetic waves interacting with clouds and precipitation. Another field intimately related to cloud physics is atmospheric chemistry, which involves the chemical composition of the atmosphere and the life cycle and characteristics of its gaseous and particulate constituents. In view of the natural interdependence of the various aspects of cloud physics, the subject of microphysics cannot be discussed very meaningfully out of context. Therefore, we have found it necessary to touch briefly upon a few simple and basic concepts of cloud dynamics and thermodynamics and to provide an account of the major characteristics of atmospheric aerosol particles. We have also included a separate chapter on some of the effects of electric fields and charges on the precipitation-forming processes.

Fundamentals of Meteorology Vlado Spiridonov, Mladen Ćurić, 2020-11-05 This book is dedicated to the atmosphere of our planet and discusses historical and contemporary achievements in meteorological science and technology for the betterment of society. The book explores many significant

atmospheric phenomena and physical processes from the local to global scale as well as from the perspective of short and long term time scales and links these processes to various applications in other scientific disciplines with linkages to meteorology In addition to addressing general topics such as climate system dynamics and climate change the book also discusses atmospheric boundary layer atmospheric waves atmospheric chemistry optics photometeors electricity atmospheric modeling and numeric weather prediction Through its interdisciplinary approach the book will be of interest to researchers students and academics in meteorology and atmospheric science environmental physics climate change dynamics air pollution and human health impacts of atmospheric aerosols

Climate Variability of Southern High Latitude Regions

Neloy Khare,2022-04-06 This is the first book to provide a comprehensive overview of climate change related investigations carried out by Indian researchers through initiatives in southern high latitude regions It explains climate variability over the Southern Ocean and Antarctica air sea ice and atmosphere interactions and the impact of climate variability on sea ice and the polar atmosphere The data were gathered at two Indian research bases Maitri and Bharti which are ideal sites to study and understand climatic evolution in Antarctic in the past and recent changes This book helps to understand climatological perspectives and to evaluate some of the most pressing issues in the south polar region FEATURES Highlights the achievements of India in the contemporary field of Antarctic climatology Presents four decades of research by Indian scientists in Antarctica which is now shared for the first time with the global community Includes case studies on climatological and environmental conditions of natural archives to shed light on climate scenarios in the Southern Ocean and Antarctic regions Covers various aspects of climate variability and induced air sea ice atmosphere interactions This book is edited by one of the top scientists and researchers of India in the field of paleoclimatology and the contributors are experts in the Antarctic region
