Wiseman, 2014-11-06 This edited volume presents new data and insights from the most internationally respected PGE experts representing a variety of disciplines ranging from chemistry geochemistry biology environmental science to toxicology and environmental health It builds upon three previous co edited books published by Springer Zereini and Alt Eds 1999 2000 and 2006 incorporating the most recent advances on the topic The book covers the following topical areas related to PGE sources and applications analytical methods environmental fate bioavailability and chemical behaviour use of bioindicators and human exposures and health risk potential Highly interdisciplinary in orientation this book is a comprehensive guide to academics students and professionals working in a number of different scientific fields who are interested in topics related to platinum metal emissions in the environment

Environmental Geochemistry in Tropical and Subtropical Environments Luiz Drude de Lacerda, Ricardo Erthal Santelli, Egbert K. Duursma, Jorge Joao Abrao, 2013-06-29 Three symposia on environmental geochemistry in tropical countries held in Niterói Brazil 1993 in Cartagena Colombia 1996 and in Nova Friburgo Brazil 1999 made it very clear that tropical geochemistry is of world standard and fast increasing in multi disciplinarily and impact on important geochemical paradigms It has additionally strong links with the economy of tropical countries such as mining and industrialisation and is in full development for treating environmental problems caused by human activities of urban or industrial origin We must compliment Prof Jorge Abriio and his colleagues in Brazil and Dr Gloria Prieto and her colleagues in Colombia for these ini

tiatives The participation of respectively 180 and 150 scientists coming from 15 different countries for the first and second symposia has shown that a large interest exists for tropical environmental geochemistry It also demonstrates the necessity to understand tropical environmental problems The organisation of a large international symposium is not possible without the assistance of state and federal authorities for which those of Brazil and Colombia have to be complimented The 3rd Symposium on Environmental Geochemistry in Tropical Countries was the last of the series and was attended by 22 countries and 170 participants and treated a number of related environmental and economic problems
